

**DK****ADVARSEL**

Dette modul er beregnet til tilslutning til lavsikrige elektriske spændinger. Hvis denne advarsel ignoreres, kan det føre til alvorlig legemedskadelse eller mekanisk ødeleggelse.
For at undgå fare for elektriske stød og brand skal sikkerhedsreglerne overholdes, og vejledningerne skal følges. Specifikationerne må ikke overskrides, og modulet må kun benyttes som beskrevet i det følgende.
Installationsvejledningen skal studeres omhyggeligt, før modulet tages i brug. Kun kvalificeret personale (teknikere) må installere dette modul. Hvis modulet ikke benyttes som beskrevet i denne installationsvejledning, så forringes moduels beskyttelsesforanstaltninger.

ADVARSEL

Der må ikke tilsluttes farlig spænding til modulet, før dette er fastmonteret, og følgende operationer bør kun udføres på modulet i spændingslös tilstand og under ESD-sikre forhold:

- Installation, ledningsmontage og -demontering, Fejlfinding på modulet.
- Reparation af modulet og udskiftning af sikringer må kun foretages af PR electronics A/S.

ADVARSEL

Modulets frontplate må ikke åbnes, da dette vil medføre skade på stikforbindelsen til display / programmeringsfronten PR 45xx. Modulerne indeholder ingen DIP-switch eller jumpere.

SIKKERHEDSREGLER

Mottagelse og opækning
Udpak modulet, uden at beskadige det. Kontroller ved mottagelsen, at modultypen svare til den bestilte. Indpakningen bør følge modulet, indtil dette er monteret på blivende plads.

Miljøforhold
Undgå direkte sollys, kraftigt støv eller varme, mekaniske rystelser og stød, og udsæt ikke modulet for regn eller kraftig fugt. Om nødvendigt skal opvarmning, ud over de oprigine græsner for omgivelsetstemperatur, forhindres ved hjælp af ventilation.

Alle moduler kan anvendes i Måle- / overspændings-kategori II og Forureningsgrad 2. Modulerne er designet til at være sikre mindst op til en højde af 2000 mm.

Installation
Modulet må kun tilsluttes af kvalificerede teknikere, som er bekendte med de tekniske udtryk, advarsler og instruktioner i installationsvejledningen, og som vil følge disse.

Hvis der er tvivl om modulets rette håndtering, skal der rettes henvendelse til den lokale forhandler eller alternativt direkte til PR electronics A/S.

Det er ikke tilladt at benytte flerkort ledning ved tilslutning af forsnyringsspænding med mindre ledningsendene er forsnyret med ledningsstyrer.

Beskadigede ledninger må ikke benyttes på sideskitterne fra den produktionsmaskine og skal forsynes fra en dobbeltisolert/ forsterket isoleret spændingsforsyning. En afbryder placeres let tilgangeligt og tæt ved modulet. Afbryderen skal markeres således, at den ikke er tvivl om, at den afbryder spændingen til modulet.

Ved installation på Power Rail 9400 bliver spændingsspændingen leveret af Power Control Unit type 9410.

Kalibrering og justering

Under kalibrering og justering skal måling og tilslutning af eksterne spændinger udføres i henhold til denne installationsvejledning, og teknikeren skal benytte sikkerhedsmæssigt korrekte værktøj og instrumenter.

Betjening under normal drift

Operater må kun indstille eller betjene modulerne, når disse er fast installeret på forsvarlig måde i tavler el. lignende, så betjeningen ikke medfører fare for liv eller materiel. Dvs., at der ikke er berøringsfare, og at modulet er placeret, så det er let at betjene.

Rengøring

Modulet må, i spændingslös tilstand, rengøres med en klud moistened med destilleret vand.

Elektriske specifikationer

Specifikationsområder..... -20°C til +60°C

Forsyningsspænding..... 19,2...31,2 VDC

Max. forbrug..... ≤ 2,1 W

Max. effektstab..... ≤ 1,7 W

Sikring..... 1,25 A T / 250 VAC

Isolationsspændinger, test / drift:

Indgang til alle..... 2,6 KVAC / 300 VAC forstærket

Analog udgang til forsyning..... 2,6 KVAC / 300 VAC forstærket

Statusrelæ til forsyning..... 1,5 KVAC / 150 VAC forstærket

Kalibreringstemperatur..... 20...28°C

EMC-immunitetsprøvkning..... < 0,5% af span

Udbyldt EMC-immunitet:

NAMUR NE21, A-krit, gniststof: < 1% af span

2-trådsforsyning (Klemme 44...43): 25...16 VDC / 0...20 mA

Relat luftfugtighed: 95% RH (ikke kond.)

Mål, med pr. 451x51 (H x B x D): 109x23,5x116/131 mm

Mål, uden pr. 451x51 (H x B x D): 109x23,5x104 mm

Kapslingsklassse: IP20

Indgang for RTD-type:

Pt10, Pt20, Pt50, Pt100, Pt200, Pt250, Pt300,

Pt400, Pt500, Pt1000

Ni50, Ni100, Ni120, Ni1000

Indgang for TC-type:

B, E, J, K, L, N, R, S, T, U, W3, W5, LR

Current input:

Program. measurement ranges..... 0...20 and 4...20 mA

Input resistance..... Nom. 20 Ω + PTC 50 Ω

Voltage input:

Program. measurement ranges..... 0,1/0,2...1/0,5/1...5/

0,10 and 2...10 VDC

Current output:

Programmable signal ranges..... 0...20/4...20/20...0/

20...4 mA

Load..... ≤ 600 Ω

Load stability..... ≤ 0,01% of span / 100 Ω

Sensor error detection..... 0 / 3,5 / 23 mA / none

NAMUR NE43 Upscale / Downscale..... 23 mA / 3,5 mA

Strombegrenzung..... ≤ 28 mA

Approvals:

DNV-GL, Ships & Offshore..... TAA000000JD

ClassNK..... TA18527M

c UL us, UL 61010-1..... E314307

EAC..... TR-CU 020/2011

EU DECLARATION OF CONFORMITY

(9116Doc_102)

UK**WARNING**

This device is designed for connection to hazardous electric voltages. Ignoring this warning can result in severe personal injury or mechanical damage.
GENERAL To avoid the risk of electric shock and fire, the safety instructions of this guide must be observed and the guidelines followed. The specifications must not be exceeded, and the device must only be applied as described in the following.
Prior to the commissioning of the device, this installation guide must be examined carefully.
Only qualified personnel (technicians) should install this device. If the equipment is used in a manner not specified by the manufacturer, the protection provided by the equipment may be impaired.

WARNING

Until the device is fixed, do not connect hazardous voltages to the device.
The following operations should only be carried out on a disconnected device and under ESD safe conditions:
General mounting, connection and disconnection of wires.
Troubleshooting the device.
Repair of the device and replacement of circuit breakers must be done by PR electronics A/S only.

WARNING

Do not open the front plate of the device as this will cause damage to the connector for the display / programming front PR 45xx. The SYSTEM 9000 devices contain no DIP-switches or jumpers.

Safety Instructions

Receipt and unpacking
Unpack the device without damaging it. The packing should always follow the device until this has been permanently mounted. Check at the receipt of the device whether the type corresponds to the one ordered.

Environment
Avoid direct sunlight, dust, high temperatures, mechanical vibrations and shock, as well as rain and heavy moisture. If necessary, heating in excess of the stated limits for ambient temperatures should be avoided by way of ventilation.
All devices can be used for Measurement / Overvoltage Category II and Pollution Degree 2. The modules are designed to be safe at least under an altitude of up to 2000 m.

Mounting
Only qualified technicians who are familiar with the technical terms, warnings, and instructions in this installation guide and who are able to follow these should connect the device. Should there be any doubt as to the correct handling of the device, please contact your local distributor or, alternatively, PR electronics A/S.

The use of stranded wires is not permitted for mains wiring except when wires are fitted with cable ends. Descriptions of input / output and supply connections are shown in the product manual and on the side label.
The device is provided with power double terminal and shall be supplied by a Power Supply having double / reinforced insulation. A power switch shall be easily accessible and close to the device. The power switch shall be marked as the disconnecting unit for the device.
For installation on Power Rail 9400 the power is supplied by Power Control Unit 9410.

Calibration and adjustment

During calibration and adjustment, the measuring and connection of external voltages must be carried out according to the specifications of this installation guide. The technician must use tools and instruments that are safe to use.

Cleaning

When disconnected, the device may be cleaned with a cloth moistened with distilled water.

Electrical specifications

Specifications range..... -20°C to +60°C

Supply voltage..... 19,2...31,2 VDC

Max. required power..... ≤ 2,1 W

Max. power dissipation..... ≤ 1,7 W

Fuse..... 1,25 A SB / 250 VAC

Isolation-test / working:

Input to any..... 2,6 KVAC/300 VAC reinforced

Analog output to supply..... 2,6 KVAC/300 VAC reinforced

Status relay to supply..... 1,5 KVAC/150 VAC reinforced

Calibration temperature..... 20...28°C

EMC immunity influence..... < 0,5% of span

Extended EMC immunity:

NAMUR NE21, A-crit, burst: < 1% of span

2-wire supply (terminal 44...43): 25...16 VDC / 0...20 mA

Relative humidity: 95% RH (not cond.)

Dimensions with..... 4501/451x (HxWxD)..... 109x23,5x116/131 mm

Dimensions without..... 4501/451x (HxWxD)..... 109x23,5x104 mm

Protection degree..... IP20

Input for RTD types:

Pt10, Pt20, Pt50, Pt100, Pt200, Pt250, Pt300,

Pt400, Pt500, Pt1000

Ni50, Ni100, Ni120, Ni1000

Input for TC types:

B, E, J, K, L, N, R, S, T, U, W3, W5, LR

Current input:

Program. measurement ranges..... 0...20 and 4...20 mA

Input resistance..... Nom. 20 Ω + PTC 50 Ω

ATEX Installation drawing 9116QA01-V8R0

For safe installation of 9116 the following must be observed. The module shall only be installed by qualified personnel who are familiar with the national and international laws, directives and standards that apply to this area.

Year of manufacture can be taken from the first two digits in the serial number.

The 4501 programming module is to be used solely with PR electronics modules. It is important that the module is undamaged and has not been altered or modified in any way. Only 4501 modules free of dust and moisture shall be installed.

INMETRO Desenhos para Instalação 9116QB01-V7R0

Para instalação segura do 9116 o manual segue deve ser observado. O módulo deve ser instalado somente por profissionais qualificados que estão familiarizados com as leis nacionais e internacionais de segurança, bem como com as normas que aplicam a este área.

O uso de fiação pode ser restrito a um dos seguintes tipos de fiação de número de série.

Para instalação na Zona 2 existe deve ser observado. O módulo de programação de 4501, deve ser utilizado apenas com os módulos PRFelectronics. É importante que o módulo esteja intacto e não tenha sido alterado ou modificado de qualquer maneira.

Apenas os módulos 4501 livres de poeira e umidade devem ser instalados.
