

Isolated converter

3105

- Isolation and conversion of standard DC signals
- Response time < 7 ms
- DIP switch configuration
- Low cost
- Slimline housing of 6.1 mm

Functional highlights

- Galvanic separation of analog current and voltage signals.
- A competitive choice in terms of both price and technology for galvanic isolation of all signal types to SCADA systems or PLC equipment.
- High 3-port isolation provides surge suppression that protects the control system from transients and noise and eliminates ground loops.
- All terminals are over-voltage protected, polarity protected and short-circuit protected.
- Approved for marine applications.

Technical highlights

- Flexible 24 VDC ($\pm 30\%$) supply via power rail or connectors.
- Factory-calibrated measurement ranges.
- Fast response time < 7 ms.
- Excellent signal/noise ratio > 60 dB.
- High galvanic isolation of 2.5 kVAC.
- Inputs and outputs are floating and galvanically separated.
- A green front LED indicates normal operation and malfunction.

Programming

- Easy configuration via DIP switches.

Mounting / installation

- The narrow 6.1 mm housing allows up to 163 units per meter.
- Units can be mounted side by side, horizontally and vertically, without air gap on a standard DIN rail, even at 70°C ambient temperature.
- Units can be supplied separately or installed on PR 9400 power rail.
