

## PAINTING SYSTEMS for PR 7501 EXPLOSION-PROOF HOUSINGS

Lp.	Painting system	System name	Used lacquers		Thickness of paint coating		
1	c c	Epoxide	Any RAL	Sigmacover 456	70 µm ±1	L5 µm	
2	SE	lacquer (wet)	RAL 9006	Temacoat RM 40	80 µm ±1	L5 µm	
7		Polyurethane	Any RAL	Sigmacover 280	70 µm	120 um + 20 ···	
3				Sigmadur 520	50 µm	120 μm ±20 μm	
4	SPU	lacquer (wet)	RAL 9006	Sigmacover 280	70 µm	120 + 20	
4				Temadur 50	50 µm	120 µm ±20 µm

# GENERAL FEATURES OF DIFFERENT TYPES OF PAINT

O - excellent		Main properties					
▲ - good		Ероху	Epoxy + polyurethane				
• - bad		E, SE	SE+SPU				
Durability of gloss		•	0				
Durability of color		•	0				
	Resistance against						
Submergence in water	r	0	<b>A</b>				
Rain (water vapor cor	ndensation)	0	0				
Solvents		<b>A</b>	•				
Solvents (splash)		0	0				
Acids		•	•				
Acids (splash)		<b>A</b>	<b>A</b>				
Alkalies		0	•				
Alkalies (splash)		0	0				
	Temperature resista	ance in dry conditions					
Up to 100°C		0	0				
Up to 150°C		<b>A</b>	<b>A</b>				
Up to 200°C		•	•				
	Physical properties						
Erasure resistance		0	<b>A</b>				
Impact resistance		<b>A</b>	0				
Flexibility		0/ 🛦	0				
Hardness		0/4	<b>A</b>				
Resistance against te	mperature changes	•	<b>A</b>				
	Application						
Indoor location		Yes	Yes				
	In dark places	Yes	Yes				
Outdoor location	Exposed to sunlight	No*	Yes				
Outdoor location	* Not recommended - after 3 to 4 years yellowing and chalking can occur, which will cause loss of gloss and color.

## APPLICATIONS OF PAINTING SYSTEMS

Painting system	Application			
	Indoor location	Outdoor location		
PS5	<ul> <li>Offices, shops, hotels, schools</li> <li>Non-heated buildings with mist condensation</li> <li>Production halls with high humidity and contamination, e.g. food plants, breweries, etc.</li> <li>Chemical plants, swimming pools, shipyards, repair shipyards</li> <li>Buildings and areas with almost continuous mist condensation and high contamination</li> </ul>	<ul> <li>Rural atmospheres, urban and industrial atmospheres with moderate sulphur dioxide pollution</li> <li>Coastal areas with low salinity</li> <li>Industrial areas and coastal areas with moderate salinity</li> <li>Industrial areas with high humidity and agressive atmospheres</li> <li>Desert areas</li> </ul>		
PS6	As above	<ul><li>As above, plus</li><li>Coastal and offshore areas with high salinity</li></ul>		

# TESTING METHODS OF PAINTING SYSTEMS

Corrosion category	Durability period	Chemical resistance in (h) ISO 2812-1	Water steam condensation in (h) ISO 6270	Neutral salt mist in (h) ISO 7253
C2	L M H	-	48 48 120	-
C3	L M H	-	48 120 240	120 240 480
C4	L M H	-	120 240 480	240 480 720
C5-I	L M H	168	240 480 720	480 720 1440
C5-M	L M H	-	240 480 720	480 720 1440

2021-11-19 Page 3

## CORROSION CATEGORY ACCORDING TO ISO 12944-2

Corrosion category	Corrosion exporsure	Layer thickness loss of carbon steel in (µm) (during first year exposure)	Main features of environment	
C2	Low	1,3-25	Atmospheres with low level of pollution, mostly rural areas.	
C3	Medium	25-50	Urban and industrial atmospheres, moderate sulphur dioxide pollution. Coastal areas with low salinity.	
C4	High	50-80	Industrial areas and coastal areas with moderate salinity.	
C5-I	Very high - industrial	80-200	Industrial areas with high humidity and agressive atmospheres.	
C5-M	Very high - marine	80-200	Coastal and offshore areas with high salinity.	
Durability of painting systems: L - low, from 2 to 5 years M - medium, from 5 to 15 years H - high, over 15 years		Durablity of painting systems is not guarantee period. The guarantee period is a legal regulation. There are no rules which connect both regulations.

# PAINTING SYSTEMS: CORROSION CATEGORY AND DURABILITY Painting system = base material + surface finishing + paint layer

Painting system	Base material	Surface finishing	Paint type	No. of layers	Thickness of one layer in (µm)	Total thickness of the layers in (µm)
PS5	Copper free	1. Vibration abbrasive	E	1	70	70
F33	Aluminum alloy • AK-11B 1C	treatment in ceramic chips.	SE	1	70	70
	• CG-A1Si12 no. 230	2. Washing in alkalies.				
	• EN AC-	3. Yellow	SE	1	70	
PS6	A1Si12mod	chromating or	+	+	+	120
	<ul> <li>EN AC- 44200mod</li> </ul>	chromium free, conversion	SPU	1	50	
	4420011100	treatment.				

Painting system	Applications	Maximum durability period	UV rays resistant
PS5	C2, C3 → C4 → C5-I → C5-M →	H M L L	No
PS6	C2, C3, C4 → C5-I → C5-M →	H M M	Yes
