5104

Repeater / Power Supply

No. 5104V104-UK
From ser. no. 030250001

Signals the best

PR electronics A/S offers a wide range of analogue and digital signal conditioning modules for industrial automation. The product range includes Isolators, Displays, Ex Interfaces, Temperature Transmitters, and Universal Modules. You can trust our products in the most extreme environments with electrical noise, vibrations and temperature fluctuations, and all products comply with the most exacting international standards. »Signals the Best« is the epitome of our philosophy – and your guarantee for quality.

PR electronics A/S offre une large gamme de produits pour le traitement des signaux analogiques et numériques dans tous les domaines industriels. La gamme de produits s’étend des transmetteurs de température aux afficheurs, des isolateurs aux interfaces SI, jusqu’aux modules universels. Vous pouvez compter sur nos produits même dans les conditions d’utilisation sévères, p.ex. bruit électrique, vibrations et fluctuations de température. Tous nos produits sont conformes aux normes internationales les plus strictes. Notre devise »SIGNALS the BEST« c’est notre ligne de conduite - et pour vous l’assurance de la meilleure qualité.

GENERAL

WARNING
This device is designed for connection to hazardous electric voltages.
Ignoring this warning can result in severe personal injury or mechanical damage.
To avoid the risk of electric shock and fire, the safety instructions of this manual must be observed and the guidelines followed.
The specifications must not be exceeded, and the device must only be applied as described in the following.
Prior to the commissioning of the device, this manual must be examined carefully.
Only qualified personnel (technicians) should install this device.
If the equipment is used in a manner not specified by the manufacturer, the protection provided by the equipment may be impaired.

HAZARDOUS VOLTAGE

WARNING
Until the device is fixed, do not connect hazardous voltages to the device.
The following operations should only be carried out on a disconnected device and under ESD safe conditions:
   - Dismantlement of the device for setting of DIP-switches and jumpers.
   - General mounting, connection and disconnection of wires.
   - Troubleshooting the device.

Repair of the device and replacement of circuit breakers must be done by PR electronics A/S only.

INSTALLATION

WARNING
SYSTEM 5000 must be mounted on DIN rail according to DIN 46277.
The communication connector of SYSTEM 5000 is connected to the input terminals on which dangerous voltages can occur, and it must only be connected to the programming unit Loop Link by way of the enclosed cable.
SYMBOL IDENTIFICATION

The CE mark proves the compliance of the device with the essential requirements of the directives.

The double insulation symbol shows that the device is protected by double or reinforced insulation.

Ex devices have been approved acc. to the ATEX directive for use in connection with installations in explosive areas.

SAFETY INSTRUCTIONS

DEFINITIONS
Hazardous voltages have been defined as the ranges: 75 to 1500 Volt DC, and 50 to 1000 Volt AC. Technicians are qualified persons educated or trained to mount, operate, and also troubleshoot technically correct and in accordance with safety regulations. Operators, being familiar with the contents of this manual, adjust and operate the knobs or potentiometers during normal operation.

RECEIPT AND UNPACKING
Unpack the module without damaging it. The packing should always follow the module until this has been permanently mounted. Check at the receipt of the module whether the type corresponds to the one ordered.

ENVIRONMENT
Avoid direct sunlight, dust, high temperatures, mechanical vibrations and shock, as well as rain and heavy moisture. If necessary, heating in excess of the stated limits for ambient temperatures should be avoided by way of ventilation. All devices fall under Installation Category II, Pollution Degree 1, and Insulation Class II.
**MOUNTING**

Only technicians who are familiar with the technical terms, warnings, and instructions in the manual and who are able to follow these should connect the device. Should there be any doubt as to the correct handling of the device, please contact your local distributor or, alternatively,

PR electronics A/S,  
www.prelectronics.com

Mounting and connection of the device should comply with national legislation for mounting of electric materials, i.e. wire cross section, protective fuse, and location. Descriptions of input / output and supply connections are shown in the block diagram and side label.

The following apply to fixed hazardous voltages-connected devices:

- The max. size of the protective fuse is 10 A and, together with a power switch, it should be easily accessible and close to the device. The power switch should be marked with a label telling it will switch off the voltage to the device.

Year of manufacture can be taken from the first two digits in the serial number.

**CALIBRATION AND ADJUSTMENT**

During calibration and adjustment, the measuring and connection of external voltages must be carried out according to the specifications of this manual. The technician must use tools and instruments that are safe to use.

**NORMAL OPERATION**

Operators are only allowed to adjust and operate devices that are safely fixed in panels, etc., thus avoiding the danger of personal injury and damage. This means there is no electrical shock hazard, and the device is easily accessible.

**CLEANING**

When disconnected, the device may be cleaned with a cloth moistened with distilled water.

**LIABILITY**

To the extent the instructions in this manual are not strictly observed, the customer cannot advance a demand against PR electronics A/S that would otherwise exist according to the concluded sales agreement.
EC DECLARATION OF CONFORMITY

As manufacturer

PR electronics A/S
Lerbakken 10
DK-8410 Rønde

hereby declares that the following product:

Type: 5104
Name: Repeater / Power Supply

is in conformity with the following directives and standards:

The EMC Directive 2004/108/EC and later amendments
EN 61326-1 : 2006

For specification of the acceptable EMC performance level, refer to the electrical specifications for the device.

The Low Voltage Directive 2006/95/EC and later amendments
EN 61010-1 : 2001

The ATEX Directive 94/9/EC and later amendments
and EN 50281-1-1 : 1998 incl. A1
ATEX certificate: DEMKO 99ATEX126013

No changes are required to enable compliance with the replacement standards:
EN 60079-0 : 2009 and EN 60079-11 : 2012

Notified body:

UL International Demko A/S
Lyskaer 8, P.O. Box 514
2730 Herlev
Denmark

Rønde, 5 November 2012

HOW TO DEMOUNT SYSTEM 5000

First, remember to demount the connectors with hazardous voltages.

**Picture 1:**
By lifting the bottom lock, the device is detached from the DIN rail.

**Picture 2:**
Then, by lifting the upper lock and pulling the front plate simultaneously the PCB is removed. Switches and jumpers can now be adjusted.
REPEATER / POWER SUPPLY
PRetrans 5104

• 1- or 2-channel version
• 3- / 5-port 3.75 kVAC galvanic isolation
• Loop supply > 17.1 V
• 20 programmable measurement ranges
• Universal supply by AC or DC

Application

• Supply voltage and safety barrier for 2-wire transmitters mounted in a hazardous area.
• Safety barrier for analogue current / voltage signals from hazardous area.
• 1 : 1 or signal conversion of analogue current / voltage signals.

Technical characteristics

• The 20 factory-calibrated measurement ranges in the 5104 can be selected by the internal DIP-switches without the need for a recalibration. Special measurement ranges can be delivered.
• PR5104 is based on microprocessor technology for gain and offset. The analogue signal is transmitted at a response time of less than 25 ms.
• Inputs, outputs, and supply are floating and galvanically separated.
• The output can be connected either as an active current / voltage transmitter or as a 2-wire transmitter.

Mounting / installation

• Mounted vertically or horizontally on a DIN rail. By way of the 2-channel version up to 84 channels per metre can be mounted.
• NB: 5104B is recommended as Ex barrier for 5331D, 5333D, 5334B, 5343B, 6331B, 6333B, and 6334B.
APPLICATIONS

2-wire transmitter

Current, mA

Voltage

3-wire transmitter
**Electrical specifications**

**Specifications range:**
-20°C to +60°C

**Common specifications:**
Supply voltage, universal .................................. 21.6...253 VAC
50...60 Hz
19.2...300 VDC

Internal consumption .................................. ≤ 2 W (2 channels)
Max. consumption........................................ ≤ 3 W (2 channels)
Fuse.......................................................... 400 mA SB / 250 VAC
Isolation voltage, test / operation ..................... 3.75 kVAC / 250 VAC
Signal / noise ratio ....................................... Min. 60 dB (0...100 kHz)
Response time (0...90%, 100...10%) .............. < 25 ms
Calibration temperature................................. 20...28°C

Hazardous (Classified) Location

Class I, Division 1, Group A, B, C, D
Class I, Zone 0 and 1, Group IIC
Class II, Division 1 Group E, F, G

Intrinsically safe apparatus entity parameters:

\[
\begin{align*}
V_{\text{max.}} (U_i) & \geq V_t (U_o) \\
I_{\text{max.}} (I_i) & \geq I_t (I_o) \\
P_i & \geq P_o \\
C_a & \geq C_{\text{cable}} + C_i \\
L_a & \geq L_{\text{cable}} + L_i
\end{align*}
\]

The sum of capacitance and inductance of cable and intrinsic safe equipment must be less or equal to \(C_a\) and \(L_a\).

**Installation notes:**

1. The maximum nonhazardous location voltage is 250VAC/DC.
2. The installation shall be in accordance with the National Electrical Code NFPA 70, Articles 504 and 505.
3. The terminals of the two individual channels shall not be interconnected in any way.
4. Install in Pollution degree 2 or better
5. Use 60 / 75 °C copper conductors with wire size AWG: (26 – 14).
6. Warning: Substitution of components may impair intrinsic safety.
Displays  Programmable displays with a wide selection of inputs and outputs for display of temperature, volume and weight, etc. Feature linearisation, scaling, and difference measurement functions for programming via PRest software.

Ex interfaces  Interfaces for analogue and digital signals as well as HART® signals between sensors / I/P converters / frequency signals and control systems in Ex zone 0, 1 & 2 and for some modules in zone 20, 21 & 22.

Isolation  Galvanic isolators for analogue and digital signals as well as HART® signals. A wide product range with both loop-powered and universal isolators featuring linearisation, inversion, and scaling of output signals.

Temperature  A wide selection of transmitters for DIN form B mounting and DIN rail modules with analogue and digital bus communication ranging from application-specific to universal transmitters.

Universal  PC or front programmable modules with universal options for input, output and supply. This range offers a number of advanced features such as process calibration, linearisation and auto-diagnosis.
