6 Product Pillars

to meet your every need

Individually outstanding, unrivalled in combination

With our innovative, patented technologies, we make signal conditioning smarter and simpler. Our portfolio is composed of six product areas, where we offer a wide range of analog and digital devices covering over a thousand applications in industrial and factory automation. All our products comply with or surpass the highest industry standards, ensuring reliability in even the harshest of environments and have a 5-year warranty for greater peace of mind.

Temperature

Our range of temperature transmitters and sensors provides the highest level of signal integrity from the measurement point to your control system. You can convert industrial process temperature signals to analog, bus or digital communications using a highly reliable point-to-point solution with a fast response time, automatic self-calibration, sensor error detection, low drift, and top EMC performance in any environment.

I.S. Interface

We deliver the safest signals by validating our products against the toughest safety standards. Through our commitment to innovation, we have made pioneering achievements in developing I.S. interfaces with SIL 2 Full Assessment that are both efficient and cost-effective. Our comprehensive range of analog and digital intrinsically safe isolation barriers offers multifunctional inputs and outputs, making PR an easy-to-implement site standard. Our backplanes further simplify large installations and provide seamless integration to standard DCS systems.

Communication

We provide inexpensive, easy-to-use, future-ready communication interfaces that can access your PR installed base of products. All the interfaces are detachable, have a built-in display for readout of process values and diagnostics, and can be configured via push-buttons. Product specific functionality includes communication via Modbus and Bluetooth and remote access using our PR Process Supervisor (PPS) application, available for iOS and Android.

Multifunction

Our unique range of single devices covering multiple applications is easily deployable as your site standard. Having one variant that applies to a broad range of applications can reduce your installation time and training, and greatly simplify spare parts management at your facilities. Our devices are designed for long-term signal accuracy, low power consumption, immunity to electrical noise and simple programming.

Isolation

Our compact, fast, high-quality 6 mm isolators are based on microprocessor technology to provide exceptional performance and EMC-immunity for dedicated applications at a very low total cost of ownership. They can be stacked both vertically and horizontally with no air gap separation between units required.

Display

Our display range is characterized by its flexibility and stability. The devices meet nearly every demand for display readout of process signals and have universal input and power supply capabilities. They provide a real-time measurement of your process value no matter the industry and are engineered to provide a user-friendly and reliable relay of information, even in demanding environments.

Warning

This device is designed for connection to hazardous electric voltages. Ignoring this warning can result in severe personal injury or mechanical damage.

To avoid the risk of electric shock and fire, the safety instructions and warnings of this guide must be observed and the guidelines followed. The specifications must not be exceeded, and the device must only be applied as described in the following.

Prior to the commissioning of the device, this guide must be examined carefully.

Only qualified personnel (technicians) should operate this device. If the equipment is used in a manner not specified by the manufacturer, the protection provided by the equipment may be impaired.

Repair of the device must be done by PR electronics A/S only.

Warning - risk of explosion hazard

To avoid risk of explosion and injury:

- Do not use this equipment when a flammable or combustible atmosphere is present.
- Do not replace batteries unless area is known to be safe.
- Use 3 x 1.5 V TYPE AAA batteries only and insert correctly as stipulated in battery compartment.

Warning - risk of electrical shock

To avoid risk of electrical shock and injury:

- Do not disconnect the cable from ConfigMate 4590 while cable is connected to a SYSTEM 3000 device.
- Do not remove PR 4500 communication interfaces while the cable is connected to a SYSTEM 3000 device.
- Do not replace batteries while the cable is connected to a SYSTEM 3000 device.

Symbol identification

Triangle with an exclamation mark: Warning / demand. Potentially lethal situations.

The CE mark proves the compliance of the device with the essential requirements of the directives.

The UKCA mark proves the compliance of the device with the essential requirements of the UK regulations.

The double insulation symbol shows that the device is protected by double or reinforced insulation.

Safety instructions

Definitions

Hazardous voltages have been defined as the ranges: 75...1500 Volt DC, and 50...1000 Volt AC.

Technicians are qualified persons educated or trained to mount, operate, and also trouble-shoot technically correct and in accordance with safety regulations.

Operators, being familiar with the contents of this manual, adjust and operate the knobs or potentiometers during normal operation.

Receipt and unpacking

Unpack the device without damaging it and check whether the device type corresponds to the one ordered.

Environment

Avoid direct sun light, dust, high temperatures, mechanical vibrations and shock, and rain and heavy moisture.

The device must be installed in pollution degree 2 or better.

The device is designed to be safe at least under an altitude up to 2 000 m.

The device is designed for indoor use.

Normal operation

Only technicians who are familiar with the technical terms, warnings, and instructions in the manual and who are able to follow these should connect the device.

Should there be any doubt as to the correct handling of the device, please contact your local distributor or, alternatively,

PR electronics A/S
www.prelectronics.com

Battery replacement

Replace batteries with 3 x 1.5V TYPE AAA (not included).

Cleaning

When disconnected, the device may be cleaned with a cloth moistened with distilled water.

Liability

To the extent the instructions in this manual are not strictly observed, the customer cannot advance a demand against PR electronics A/S that would otherwise exist according to the concluded sales agreement.

Electrical specifications

Environmental conditions

Operating temperature	-20°C to +60°C
Storage temperature	-20°C to +85°C
Relative humidity	< 95% RH (non-cond.)
Protection degree	IP20
Installation in pollution degree 2 & measurement / overvoltage category II.	

Observed authority requirements

RoHS.	2011/65/EU & UK SI 2012/3032

Standards

UL, Standard for Safety	UL 61010-1
-----------------------------------	------------

Application

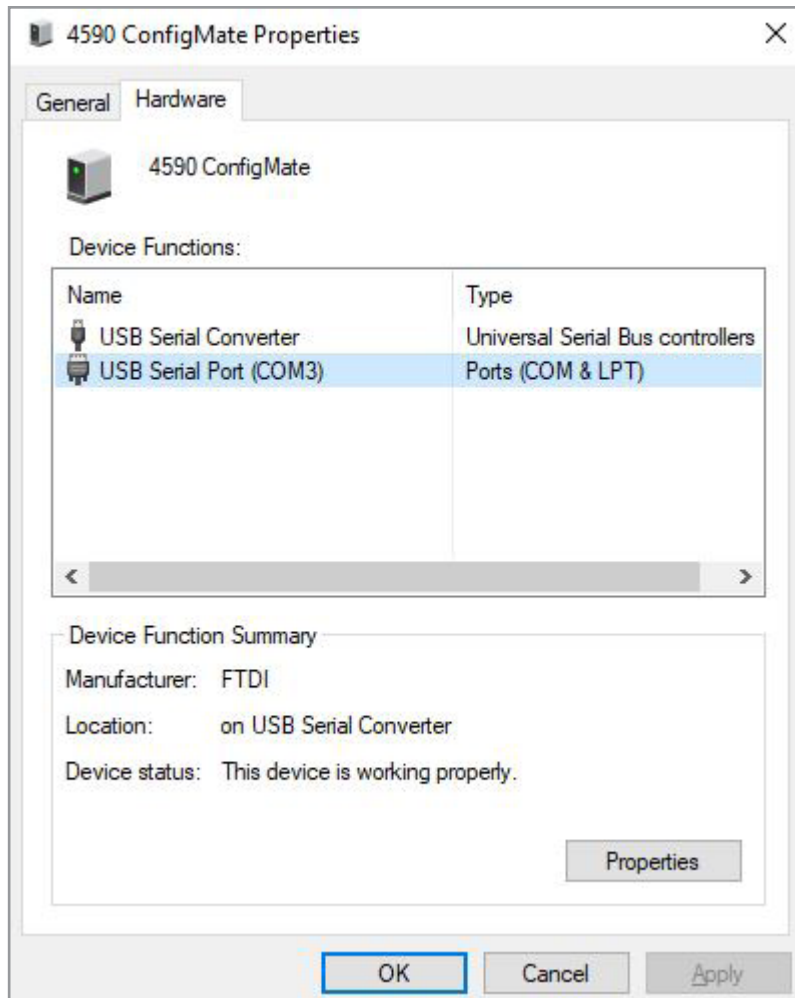

The ConfigMate 4590 is a USB communications interface which is used along with the detachable programming displays in the PR 4500 series to configure or document and backup / restore configurations of selected PR electronics' programmable devices, either standalone in Adaptor Mode or with a PC in Docking Mode.

Docking Mode

- The 4590 can operate as a docking station for the PR 4500 devices, allowing the PR 4500 to be connected to a PC through a USB interface. The PRreset software can be used to upload and download the configuration parameters from a PR 4500 device for backup/restore and documentation purposes, on selected 3000, 4000 and 9000 series devices.

Please note:

- For connection to a PC the USB-B to USB-A cable must be used.
- In docking station mode the 4590 will be powered from the PC's USB power source; no batteries are required.
- The PR 4500 device will indicate USB line / communication with a very short blink when uploading or downloading configurations from / to the PR 4500.
- The selected 3000, 4000 and 9000 device configurations can only be viewed in the Preset software. For installation of PRreset, see the step-by-step guide on page 9.
- After connecting the 4590 to a PC, check installation and allocation of the COM port by opening up "Device Manager" and locating "4590 ConfigMate". Right-click on the device and select "Properties", then click on the "Hardware" tab. In the below example, the 4590 ConfigMate was assigned COM3, however this may change from installation to installation. Take a note of which COM port is assigned as this is used later in the PRreset software.

Connection of ConfigMate 4590 to a PC in Docking Mode

Connection of ConfigMate 4590 to a PR 4000/9000 Device

Note:

By default, the PR 4500 communication interface will display the desired process value when connected to a device, either directly or via ConfigMate 4590.

- To upload a configuration from a 3000/4000/9000 device to the PR 4500, you must manually go into the Memory Menu of the PR 4500 and SAVE from the target device into the PR 4500.
- To download a configuration to a 3000/4000/9000 device from the PR 4500, you must manually go into the Memory Menu of the PR 4500 and LOAD to the target device from the PR 4500.

For further details, please refer to the relevant manual for the target device.

Adaptor Mode

- The 4590 is a handheld device that can operate as an adapter between the detachable programming displays in the PR 4500 series and selected devices in the 3000 series. This allows for configuration and monitoring of process parameters of the connected devices.
- Note for connection to a 3000 series product, the PR USB-B to a 2.5 mm jack cable must be used.
- By pressing the power button, the 4590 will power on, and show the status of the attached 3000 device on the PR 4500.
- If the 3000 device is powered, the PR 4500 display will indicate the process variable or can be manually set to go into program mode.
- If the 3000 device is not powered the PR 4500 display will be in program mode only.
- Indication of battery level is displayed via the LEDs. This can be activated by using the Power/Wake-up button. If while pressing the Power / Wake-up button the LEDs are off, or only one LED is lit, the batteries should be exchanged. To extend battery life the 4590 will automatically detect if it is not in use, and will consequently shut itself down to conserve battery power.
- Battery life in Adaptor Mode is approximately 1 year of daily use, depending upon battery type.

Connection of ConfigMate 4590 to a PR 3000 Device USB and PReset installation (Docking Mode Only)

The USB communication is supported by Windows 7, 8 and 10. PR devices that can either be programmed or have their configurations saved, backedup/restored via ConfigMate 4590 are available in the configuration program PReset ver. 6.0 or higher.

Technical characteristics

The PC program PReset ver. 6.0 or higher supports ConfigMate 4590. To conserve power on a laptop, the USB connector of the 4590 can be connected to an externally supplied hub. The communications connector on the PR device is galvanically isolated from the USB connection on the PC.

System requirements

Access to internet is needed for installation of USB drivers

Installation rights

Windows 7, 8 or 10 with the following recommendations:

Processor	> 1 GHz
Memory	1 GB RAM (32-bit) or 2 GB RAM (64-bit)
Hard disk space	16 GB (32-bit) or 20 GB (64-bit)

Installation of PReset

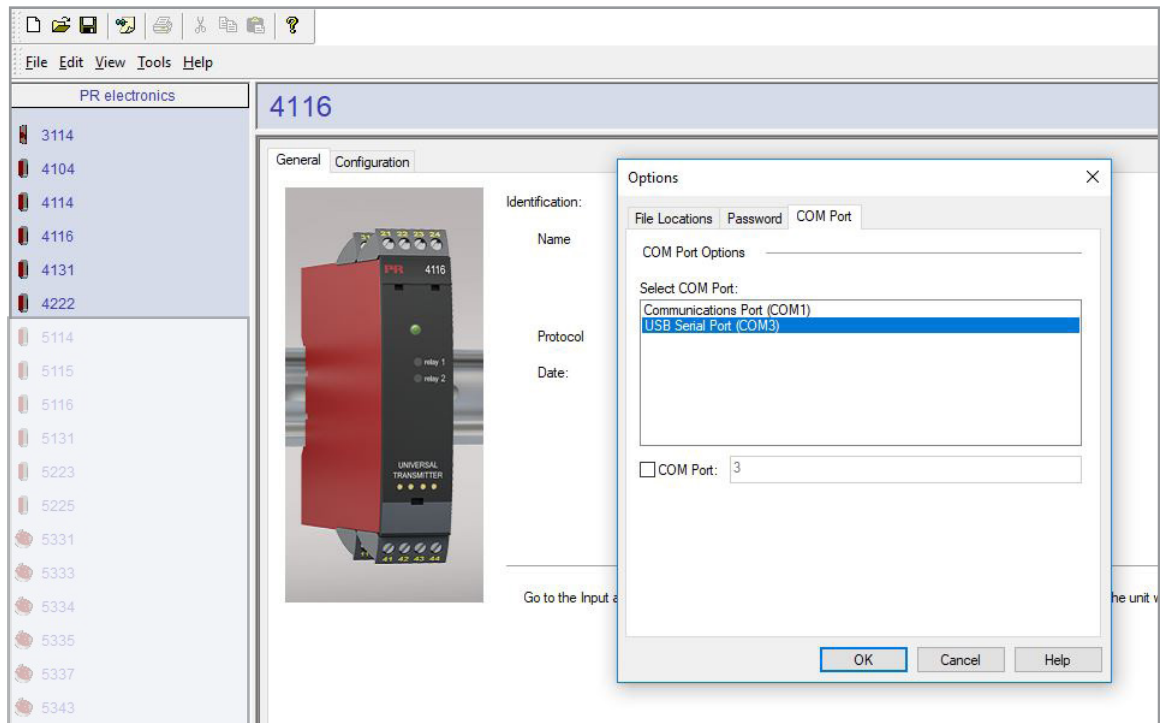

Before installing PReset, previous versions must first be uninstalled. During the uninstall process there will be an option to save existing configuration files. If this option is not accepted, then these files will be deleted during the uninstall process.

PRreset will be installed on your hard disk and the registry will be updated with all necessary information on the program. A PReset icon will automatically be placed on the desk top.

1. Download the PReset software from www.prelectronics.com/downloads/software/preset-software. Note that this is in the form of a zip file.
2. Unzip the file to the desired location.
3. To start the installation, double click the setup.exe file. When the installation program has been started, on-screen guidelines will guide you through the rest of the installation. The complete installation guide for PReset can be downloaded from www.prelectronics.com/downloads/software/preset-software.

Configuration of USB communication in PReset

1. Start the PReset program and choose [Tools] [Select COM port], and the "Options" window is shown on screen.
2. Select the COM port assigned to 4590 ConfigMate (shown as "USB Serial Port"). Click OK.

Document history

We are near you, *all over the world*

Our trusted red boxes are supported wherever you are

All our devices are backed by expert service and a 5-year warranty. With each product you purchase, you receive personal technical support and guidance, day-to-day delivery, repair without charge within the warranty period and easily accessible documentation.

We are headquartered in Denmark, and have offices and authorized partners the world over. We are a local

business with a global reach. This means that we are always nearby and know your local markets well. We are committed to your satisfaction and provide PERFORMANCE MADE SMARTER all around the world.

For more information on our warranty program, or to meet with a sales representative in your region, visit prelectronics.com.

Benefit today from ***PERFORMANCE MADE SMARTER***

PR electronics is the leading technology company specialized in making industrial process control safer, more reliable and more efficient. Since 1974, we have been dedicated to perfecting our core competence of innovating high precision technology with low power consumption. This dedication continues to set new standards for products communicating, monitoring and connecting our customers' process measurement points to their process control systems.

Our innovative, patented technologies are derived from our extensive R&D facilities and from having a great understanding of our customers' needs and processes. We are guided by principles of simplicity, focus, courage and excellence, enabling some of the world's greatest companies to achieve PERFORMANCE MADE SMARTER.
