**2-Wire HART®  
Transmitter**

No. 6335V108-IN (1021)  
From ser. no. 090926800

SIGNALS THE BEST

**DK** ▶ PR electronics A/S tilbyder et bredt program af analoge og digitale signalbehandlingsmoduler til industriel automation. Programmet består af Isolatorer, Displays, Ex-barrierer, Temperaturtransmittere, Universaltransmittere mfl. Vi har modulerne, du kan stole på i selv barske miljøer med elektrisk støj, vibrationer og temperaturudsving, og alle produkter opfylder de strengeste internationale standarder. Vores motto »Signals the Best« er indbegrebet af denne filosofi – og din garanti for kvalitet.

**UK** ▶ PR electronics A/S offers a wide range of analogue and digital signal conditioning modules for industrial automation. The product range includes Isolators, Displays, Ex Interfaces, Temperature Transmitters, and Universal Modules. You can trust our products in the most extreme environments with electrical noise, vibrations and temperature fluctuations, and all products comply with the most exacting international standards. »Signals the Best« is the epitome of our philosophy – and your guarantee for quality.

**FR** ▶ PR electronics A/S offre une large gamme de produits pour le traitement des signaux analogiques et numériques dans tous les domaines industriels. La gamme de produits s'étend des transmetteurs de température aux afficheurs, des isolateurs aux interfaces SI, jusqu'aux modules universels. Vous pouvez compter sur nos produits même dans les conditions d'utilisation sévères, p.ex. bruit électrique, vibrations et fluctuations de température. Tous nos produits sont conformes aux normes internationales les plus strictes. Notre devise »SIGNALS the BEST« c'est notre ligne de conduite - et pour vous l'assurance de la meilleure qualité.

**DE** ▶ PR electronics A/S verfügt über ein breites Produktprogramm an analogen und digitalen Signalverarbeitungsmodulen für die industrielle Automatisierung. Dieses Programm umfasst Displays, Temperaturtransmitter, Ex- und galvanische Signaltrenner, und Universalgeräte. Sie können unsere Geräte auch unter extremen Einsatzbedingungen wie elektrisches Rauschen, Erschütterungen und Temperaturschwingungen vertrauen, und alle Produkte von PR electronics werden in Übereinstimmung mit den strengsten internationalen Normen produziert. »Signals the Best« ist Ihre Garantie für Qualität!

# **EF-OVERENSSTEMMELSESKLÆRING**

Som producent erklærer

**PR electronics A/S**

**Lerbakken 10**

**DK-8410 Rønde**

hermed at følgende produkt:

**Type: 6335**

**Navn: 2-Tråds HART®-transmitter**

er i overensstemmelse med følgende direktiver og standarder:

EMC-direktivet 2004/108/EF og senere tilføjelser

**EN 61326-1 : 2006**

For specifikation af det acceptable EMC-niveau henvises til modulets elektriske specifikationer.

ATEX-direktivet 94/9/EF og senere tilføjelser

**EN 60079-0 : 2006, EN 60079-11 : 2007,**

**EN 60079-15 : 2005 og EN 60079-26 : 2007**

**ATEX-certifikat: KEMA 10ATEX0006 X (6335A)**

**ATEX-certifikat: KEMA 09ATEX0148 (6335D)**

Bemyndiget organ

**KEMA Quality B.V. (0344)**

**Utrechtseweg 310, 6812 AR Arnhem**

**P.O. Box 5185, 6802 ED Arnhem**

**The Netherlands**

# **2-TRÅDS HART®-TRANSMITTER PRETRANS 6335**

- *Indgang for RTD, TC, Ohm eller mV*
- *Ekstrem målenøjagtighed*
- *HART®-kommunikation*
- *Galvanisk isolation*
- *1- eller 2-kanals version*

## **Anvendelse**

- Temperaturlineariseret måling med Pt100...Pt1000, Ni100...Ni1000 eller termoelementføler.
- Differens- eller gennemsnitstemperaturmåling på 2 modstands- eller TC-følere.
- Omsætning af lineær modstandsændring til standard analogt strømsignal, f.eks. fra ventiler eller ohmske niveaustave.
- Forstærkning af bipolært mV-signal til et standard 4...20 mA strømsignal.
- Kobling af op til 15 kanaler til et digitalt 2-leder signal med HART®-kommunikation.

## **Teknisk karakteristik**

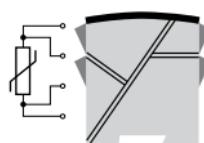

- PR6335 kan af brugeren i løbet af få sekunder programmeres til at måle indenfor alle normerede temperaturområder.
- RTD- og modstandsindgangen har kabelkompensering for 2-, 3- og 4-leder tilslutning.
- 6335 er konstrueret med et højt sikkerhedsniveau, så den er anvendelig i SIL 2 installationer.
- Udgangssignalet kan programmeres til en begrænsning.
- Der er løbende sikkerhedscheck af gemte data.
- Følerfejlsdtektering iht. retningslinierne i NAMUR NE 89.

## **Montage / installation**

- Monteres på DIN-skinne, vertikalt eller horisontalt. Med 2-kanals versionen kan der installeres 84 kanaler pr. meter.
- **NB:** Som Ex-barriere for 6335D anbefaler vi 5106B.

## **Bestillingsskema: 6335**

Type	Version	Galvanisk isolation	Kanaler
<b>6335</b>	Standard : A CSA, FM & ATEX : D	1500 VAC : 2	Enkelt : A Dobbelt : B

\*NB! Husk at bestille CJC-stik type 5910 / 5910Ex (kanal 1) og 5913 / 5913Ex (kanal 2) i forbindelse med TC-indgange med intern CJC.

## **Elektriske specifikationer**

### **Specifikationsområde:**

-40°C til +60°C

### **Fælles specifikationer:**

Forsyningsspænding DC

Standard.....	8,0...35 VDC
CSA, FM & ATEX.....	8,0...30 VDC

Isolationsspænding, test / drift ..... 1,5 kVAC / 50 VAC

Isolationsspænding, kanal 1 / kanal 2:

Standard.....	3,75 kVAC
CSA, FM & ATEX.....	1500 VAC

Opvarmningstid..... 30 s

Kommunikationsinterface..... Loop Link og HART®

Signal- / støjforhold..... Min. 60 dB

Reaktionstid (programmerbar) ..... 1...60 s

EEProm fejcheck ..... < 10 s

Signaldynamik, indgang..... 22 bit

Signaldynamik, udgang..... 16 bit

Kalibreringstemperatur..... 20...28°C

Nøjagtighed, størst af generelle og basisværdier:

Generelle værdier		
Indgangstype	Absolut nøjagtighed	Temperatur-koefficient
Alle	≤ ±0,05% af span	≤ ±0,005% af span / °C

Basisværdier		
Indgangstype	Basis-nøjagtighed	Temperatur-koefficient
Pt100 og Pt1000	$\leq \pm 0,1^\circ\text{C}$	$\leq \pm 0,005^\circ\text{C}/^\circ\text{C}$
Ni100	$\leq \pm 0,2^\circ\text{C}$	$\leq \pm 0,005^\circ\text{C}/^\circ\text{C}$
Lin. R	$\leq \pm 0,1 \Omega$	$\leq \pm 5 \text{ m}\Omega / ^\circ\text{C}$
Volt	$\leq \pm 10 \mu\text{V}$	$\leq \pm 0,5 \mu\text{V}/^\circ\text{C}$
TC-type: E, J, K, L, N, T, U	$\leq \pm 0,5^\circ\text{C}$	$\leq \pm 0,025^\circ\text{C}/^\circ\text{C}$
TC-type: B, R, S, W3, W5	$\leq \pm 1^\circ\text{C}$	$\leq \pm 0,1^\circ\text{C}/^\circ\text{C}$

EMC-immunitetspåvirkning .....  $< \pm 0,1\%$  af span

Udvidet EMC-immunitet:

NAMUR NE 21, A kriterium, gniststøj .....  $< \pm 1\%$  af span

Virkning af forsyningsspændings-

ændring .....  $< 0,005\%$  af span / VDC

Max. ledningskvadrat .....  $1 \times 1,5 \text{ mm}^2$  flerkoret ledning

Luftfugtighed .....  $< 95\% \text{ RH}$  (ikke kond.)

Mål .....  $109 \times 23,5 \times 104 \text{ mm}$

Kapslingsklasse ..... IP20

Vægt (1 / 2 kanaler) ..... 145 / 185 g

#### **Elektriske specifikationer indgange:**

Max. nulpunktsforskydning (offset) ..... 50% af valgt numerisk max. værdi

#### **RTD- og lineær modstandsindgang:**

Type	Min. værdi	Max. værdi	Min. span	Standard
Pt100	-200°C	+850°C	10°C	IEC 60751
Ni100	-60°C	+250°C	10°C	DIN 43760
Lin. R	0 Ω	7000 Ω	25 Ω	-----

Kabelmodstand pr. leder (max.) ..... 5 Ω

Følerstrøm ..... Nom. 0,2 mA

Virkning af følerkabelmodstand

(3- / 4-leder) .....  $< 0,002 \Omega / \Omega$

Følerfejlsdetektering ..... Ja

Kortslutningsdetektering ..... Hvis 0% > 30 Ω

**TC-indgange:**

Type	Min. temperatur	Max. temperatur	Min. span	Standard
B	+400°C	+1820°C	100°C	IEC584
E	-100°C	+1000°C	50°C	IEC584
J	-100°C	+1200°C	50°C	IEC584
K	-180°C	+1372°C	50°C	IEC584
L	-100°C	+900°C	50°C	DIN 43710
N	-180°C	+1300°C	50°C	IEC584

# TILSLUTNINGER

Indgange:

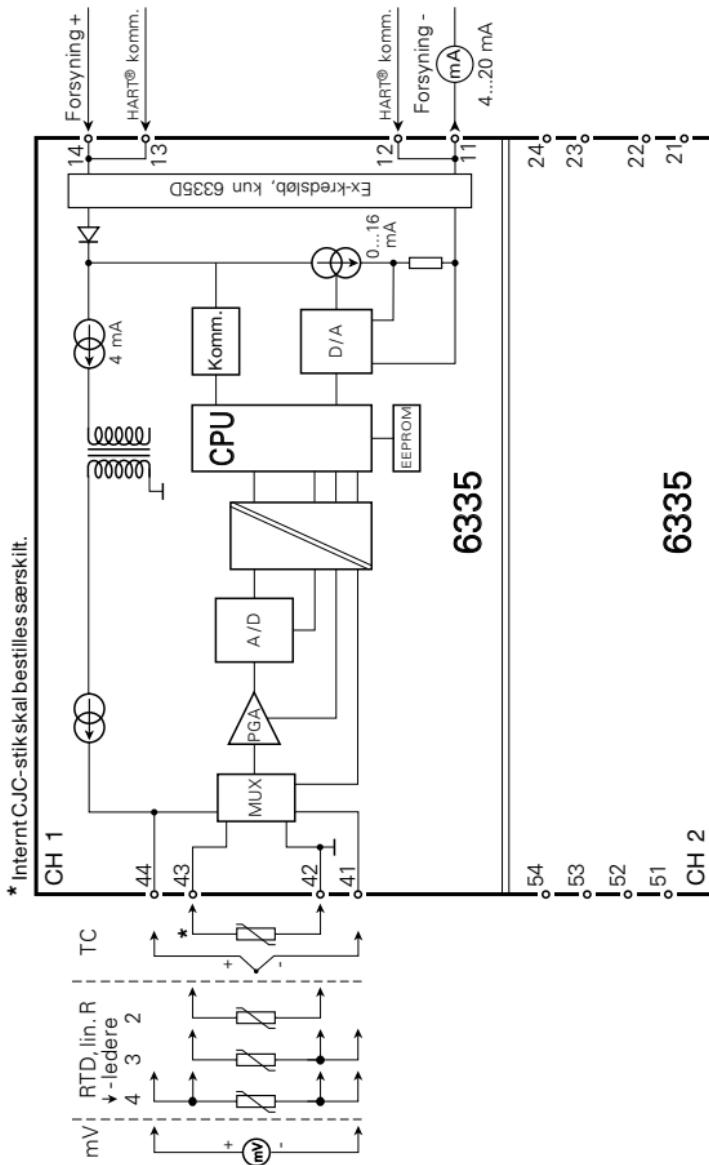

# TILSLUTNINGER

## Indgange:

# BLOKDIAGRAM

# PROGRAMMERING

PRetrans 6335 kan konfigureres på 3 måder:

1. Med PR electronics A/S' kommunikationsinterface Loop Link og PReset PC konfigurationssoftware.
2. Med HART®-modem og PReset PC konfigurationssoftware.
3. Med HART®-kommunikator indeholdende PR electronics A/S' DDL driver.

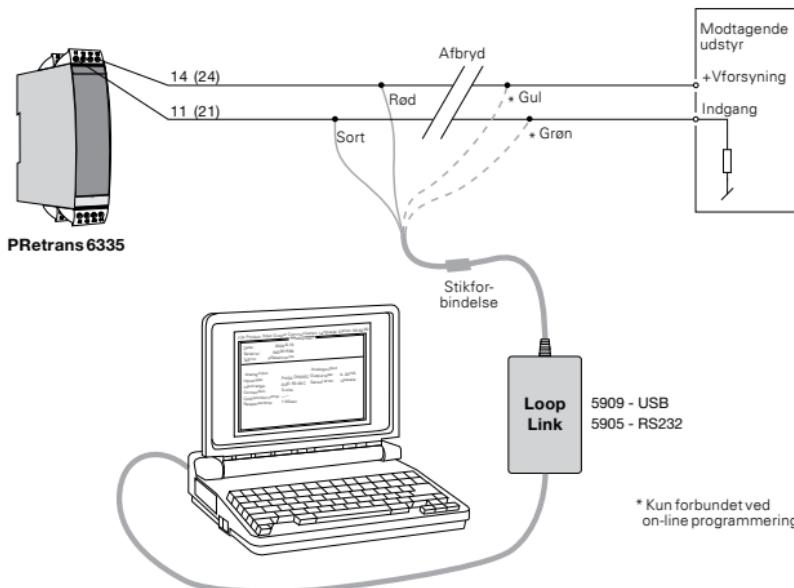

## 1: Loop Link

Ved programmering henvises til tegningen nedenfor og hjælpefunktionen i PReset programmet.

Ved kommunikation med ikke-installedede moduler må stikkene 11, 12, 13, 14 (kanal 1) og 21, 22, 23, 24 (kanal 2) afmonteres, så kommunikationsinterfa- cets tilslutningsklemmer kan forbindes til stikbenene.

Loop Link må ikke benyttes til kommunikation med moduler installeret i Ex-område.

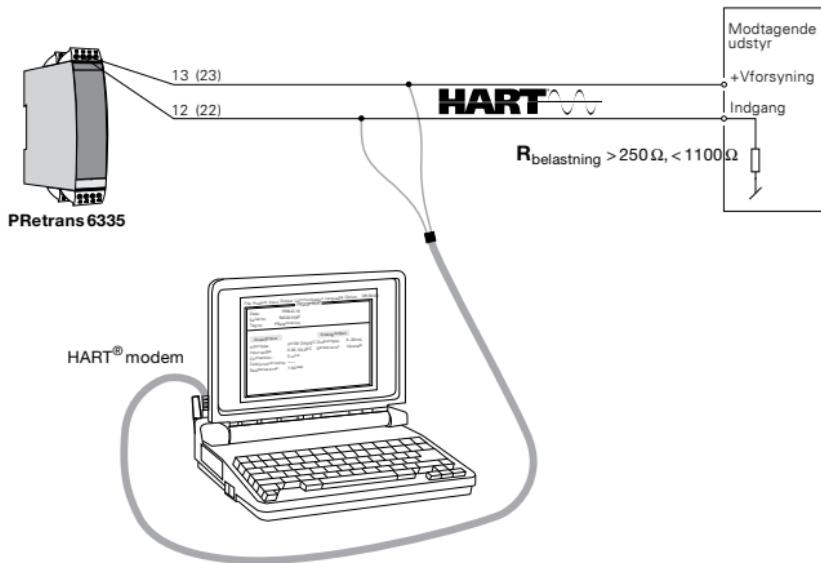

### Bestilling: Loop Link

## 2: HART®-modem

Ved programmering henvises til tegningen nedenfor og hjælpefunktionen i PRReset-programmet.

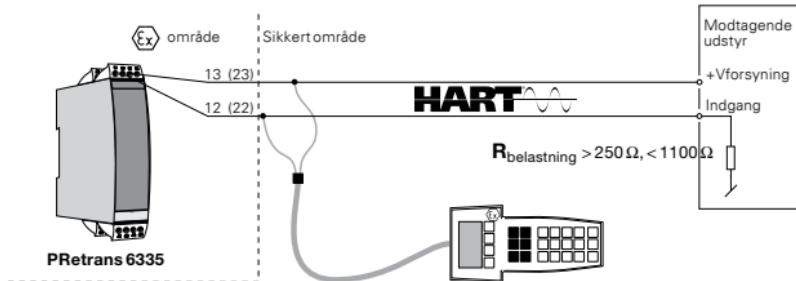

### Bestilling: HART®-modem 276D

## 3: HART®-kommunikator

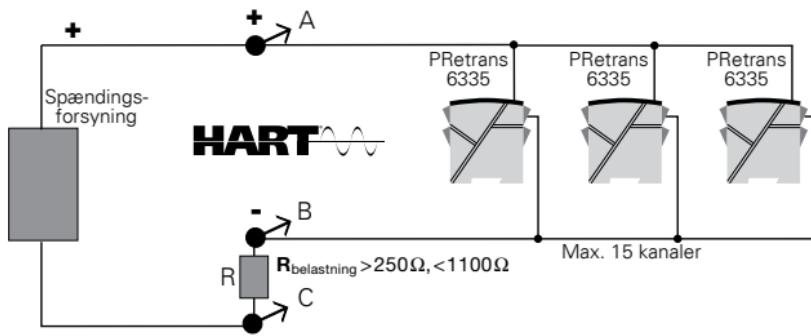

Ved programmering henvises til tegningen nedenfor. For at få adgang til produktspecifikke kommandoer skal HART®-kommunikatoren indeholde PR electronics A/S' DDL driver. Denne kan rekviseres enten hos HART®-Communication Foundation eller hos PR electronics A/S.

### Bestilling: HART®-kommunikator 275D

## FORBINDELSE AF TRANSMITTERE I MULTIDROP

- HART®-kommunikatoren eller PC-modem kan tilsluttes over punkterne AB eller BC.

- Udgangene på op til 15 kanaler kan parallelforbindes for digital HART®-kommunikation på 2-ledere.
- Hver transmitter skal, inden den tilsluttes, konfigureres med et unikt nummer fra 1 - 15. Hvis 2 transmittere konfigureres med samme nummer, ses der bort fra begge. Transmitterne skal programmeres til multidrop mode (med et fast udgangssignal på 4 mA). Den maksimale strøm i sløjfen kan dermed blive 60 mA.
- Kommunikationen kan foregå via HART®-kommunikator eller HART®-modem.
- PReset PC konfigurationssoftwaren kan konfigurere den enkelte transmitter til multidrop mode og tildele en unik polling adresse.

# **EC DECLARATION OF CONFORMITY**

As manufacturer

**PR electronics A/S**  
**Lerbakken 10**  
**DK-8410 Rønde**

hereby declares that the following product:

**Type: 6335**  
**Name: 2-wire HART® transmitter**

is in conformity with the following directives and standards:

The EMC Directive 2004/108/EC and later amendments

**EN 61326-1 : 2006**

For specification of the acceptable EMC performance level, refer to the electrical specifications for the module.

The ATEX Directive 94/9/EC and later amendments

**EN 60079-0 : 2006, EN 60079-11 : 2007,**

**EN 60079-15 : 2005 and EN 60079-26 : 2007**

**ATEX certificate: KEMA 10ATEX0006 X (6335A)**

**ATEX certificate: KEMA 09ATEX0148 (6335D)**

Notified body

**KEMA Quality B.V. (0344)**

# 2-WIRE HART® TRANSMITTER

## PRETRANS 6335

- *RTD, TC, Ohm, or mV input*
- *Extremely high measurement accuracy*
- *HART® communication*
- *Galvanic isolation*
- *1- or 2-channel version*

### Application

- Linearised temperature measurement with Pt100...Pt1000, Ni100...Ni1000, TC or sensor.
- Difference or average temperature measurement of 2 resistance or TC sensors.
- Conversion of linear resistance variation to a standard analogue current signal, for instance from valves or Ohmic level sensors.
- Amplification of a bipolar mV signal to a standard 4...20 mA current signal.
- Connection of up to 15 channels to a digital 2-wire signal with HART® communication.

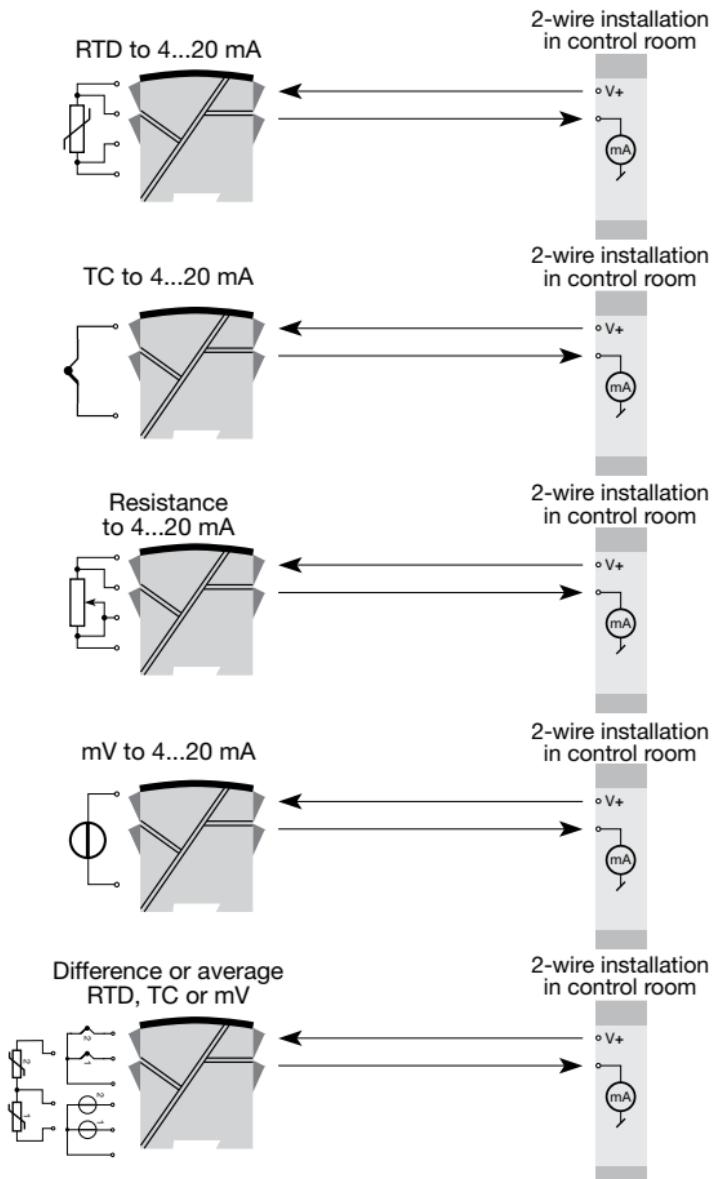

### Technical characteristics

- Within a few seconds the user can program PR6335 to measure temperatures within all ranges defined by the norms.
- The RTD and resistance inputs have cable compensation for 2-, 3- and 4-wire connection.
- The 6335 has been designed according to strict safety requirements and is thus suitable for application in SIL 2 installations.
- A limit can be programmed on the output signal.
- Continuous check of vital stored data for safety reasons.
- Sensor error detection according to the guidelines in NAMUR NE 89.

### Mounting / installation

- Mounted vertically or horizontally on a DIN rail. As the modules can be mounted without any distance between neighbouring units, up to 84 channels can be mounted per metre.
- **NB:** As Ex barrier for 6335D we recommend 5106B.

# APPLICATIONS

**Order: 6335**

Type	Version	Galvanic isolation	Channels
6335	Standard : A CSA, FM & ATEX : D	1500 VAC : 2	Single : A Double : B

\*NB! Please remember to order CJC connectors type 5910/5910Ex (channel 1) and 5913/5913Ex (channel 2) for TC inputs with an internal CJC.

## Electrical specifications

### Specifications range:

-40°C to +60°C

### Common specifications:

Supply voltage, DC

Standard.....	8.0...35 VDC
CSA, FM & ATEX.....	8.0...30 VDC

Isolation voltage, test / operation ..... 1.5 kVAC / 50 VAC

Isolation voltage, channel 1 / channel 2:

Standard.....	3.75 kVAC
CSA, FM & ATEX.....	1500 VAC

Warm-up time..... 30 s

Communications interface ..... Loop Link and HART®

Signal / noise ratio ..... Min. 60 dB

Response time (programmable) ..... 1...60 s

EEprom error check ..... < 10 s

Signal dynamics, input..... 22 bit

Signal dynamics, output..... 16 bit

Calibration temperature..... 20...28°C

Accuracy, the greater of general and basic values:

General values		
Input type	Absolute accuracy	Temperature coefficient
All	≤ ±0.05% of span	≤ ±0.005% of span / °C

Basic values		
Input type	Basic accuracy	Temperature coefficient
Pt100 and Pt1000	$\leq \pm 0.1^\circ\text{C}$	$\leq \pm 0.005^\circ\text{C}/^\circ\text{C}$
Ni100	$\leq \pm 0.2^\circ\text{C}$	$\leq \pm 0.005^\circ\text{C}/^\circ\text{C}$
Lin. R	$\leq \pm 0.1 \Omega$	$\leq \pm 5 \text{ m}\Omega / ^\circ\text{C}$
Volt	$\leq \pm 10 \mu\text{V}$	$\leq \pm 0.5 \mu\text{V}/^\circ\text{C}$
TC type: E, J, K, L, N, T, U	$\leq \pm 0.5^\circ\text{C}$	$\leq \pm 0.025^\circ\text{C}/^\circ\text{C}$
TC type: B, R, S, W3, W5	$\leq \pm 1^\circ\text{C}$	$\leq \pm 0.1^\circ\text{C}/^\circ\text{C}$

EMC immunity influence .....  $< \pm 0.1\%$  of span

Extended EMC immunity:

NAMUR NE 21, A criterion, burst .....  $< \pm 1\%$  of span

Effect of supply voltage variation .....	$< 0.005\%$ of span / VDC
Max. wire size.....	1 x 1.5 mm <sup>2</sup> stranded wire
Humidity .....	$< 95\%$ RH (non-cond.)
Dimensions.....	109 x 23.5 x 104 mm
Protection degree.....	IP20
Weigh (1 / 2 channels).....	145 / 185 g

#### Electrical specifications, inputs:

Max. offset..... 50% of selected numerical  
max. value

#### RTD and linear resistance input:

Type	Min. value	Max. value	Min. span	Standard
Pt100	-200°C	+850°C	10°C	IEC 60751

# BLOCK DIAGRAM

# PROGRAMMING

PRetrans 6335 can be configured in the following 3 ways:

1. With PR electronics A/S' communications interface Loop Link and PReset PC configuration software.
2. With a HART® modem and PReset PC configuration software.
3. With a HART® communicator with PR electronics A/S' DDL driver.

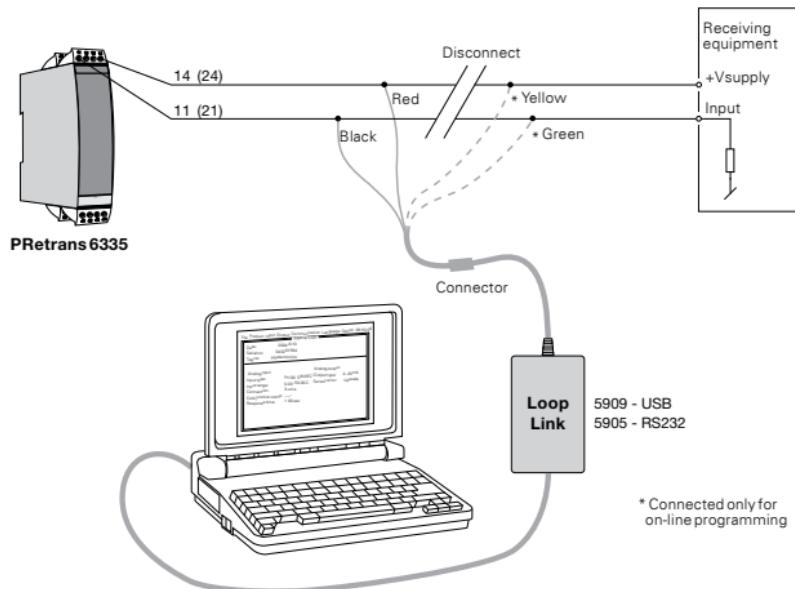

## 1: Loop Link

For programming please refer to the drawing below and the help functions in PReset.

When communicating with non-installed modules, connectors 11, 12, 13, 14 (channel 1) and 21, 22, 23, 24 (channel 2) can be dismantled in the safe area to connect the terminals of the communications interface to the pins.

Loop Link is not approved for communication with modules installed in hazardous (Ex) area.

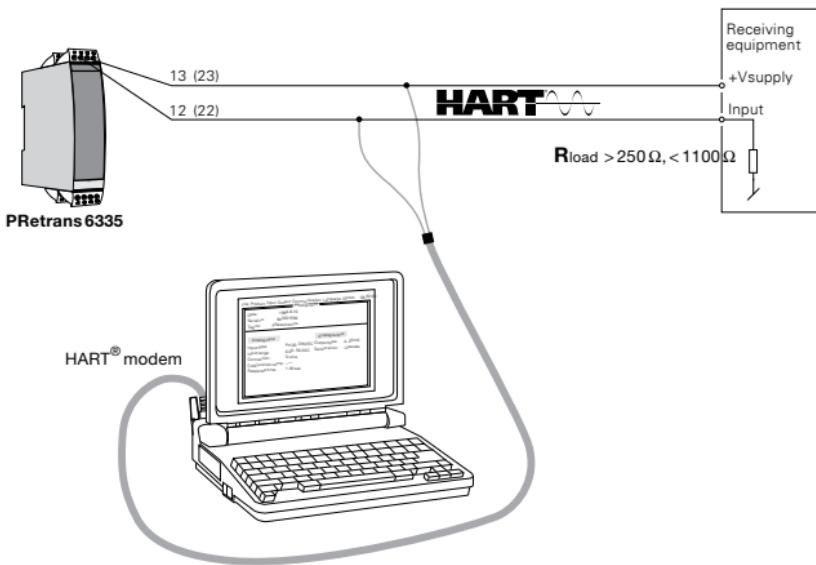

## Order: Loop Link

## 2: HART® modem

For programming please refer to the drawing below and the help functions in PReset.

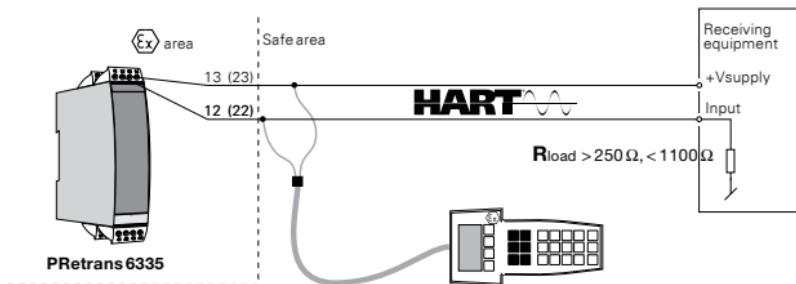

### Order: HART® modem 276D

## 3: HART® communicator

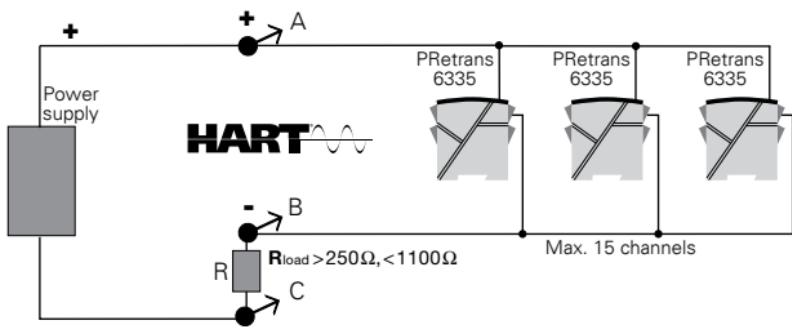

For programming please refer to the drawing below. To get access to product-specific commands, the HART® communicator must be loaded with the PR electronics A/S DDL driver. This can be ordered either at the HART® Communication Foundation or PR electronics A/S.

### Order: HART® communicator 275D

## CONNECTION OF TRANSMITTERS IN MULTIDROP MODE

- The HART® communicator or a PC modem can be connected across AB or BC.

- The outputs of max. 15 transmitters can be connected in parallel for a digital HART® communication on 2-wires.
- Before it is connected, each transmitter must be configured with a unique number from 1 to 15. If 2 transmitters are configured with the same number, both will be excluded. The transmitters must be programmed for multidrop mode (with a fixed output signal of 4 mA). Maximum current in the loop is therefore 60 mA.
- The communication is either by means of a HART® communicator or a HART® modem.
- The PReset PC configuration software can configure the individual transmitter for multidrop mode and provide it with a unique polling address.

# **DECLARATION DE CONFORMITE CE**

En tant que fabricant

**PR electronics A/S**  
**Lerbakken 10**  
**DK-8410 Rønde**

déclare que le produit suivant :

**Type : 6335**  
**Nom : Transmetteur 2-fils avec protocole HART®**

correspond aux directives et normes suivantes :

La directive CEM (EMC) 2004/108/CE et les modifications subséquentes

**EN 61326-1 : 2006**

Pour une spécification du niveau de rendement acceptable CEM (EMC)  
se référer aux spécifications électriques du module.

La directive ATEX 94/9/CE et les modifications subséquentes

**EN 60079-0 : 2006, EN 60079-11 : 2007,**

**EN 60079-15 : 2005 et EN 60079-26 : 2007**

**Certificat ATEX:KEMA 10ATEX0006 X (6335A)**

**Certificat ATEX: KEMA 09ATEX0148 (6335D)**

Organisme notifié

**KEMA Quality B.V. (0344)**

**Utrechtseweg 310, 6812 AR Arnhem**

**P.O. Box 5185, 6802 ED Arnhem**

**The Netherlands**

# **TRANSMETTEUR 2-FILS AVEC PROTOCOLE HART® PRETRANS 6335**

- *Entrée RTD, TC, résistance ou mV*
- *Très grande précision de mesure*
- *Communication avec protocole HART®*
- *Isolation galvanique*
- *Version 1- ou 2-voies*

## **Application**

- Mesure linéarisée de la température avec un capteur Pt100...Pt1000, Ni100...Ni1000 ou de thermocouples.
- Mesure de la température différentielle ou moyenne avec 2 sondes résistives ou thermocouples.
- Conversion d'une résistance linéaire en un signal courant standard analogique pour mesurer par exemple le niveau ou la position d'une vanne.
- Amplification d'un signal mV bipolaire en un signal courant standard de 4...20 mA.
- Connexion en parallèle de 15 transmetteurs au maximum pour une communication digitale avec le protocole HART®.

## **Caractéristiques techniques**

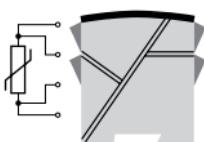

- Le PR6335 peut être programmé de manière simple et rapide.
- Compensation de ligne pour des entrées RTD et résistance avec un raccordement à 2, 3 et 4 fils.
- Le 6335 a été construit avec un niveau de sécurité élevé permettant de l'utiliser dans les installations classées SIL 2.
- Le signal de sortie peut être programmé avec un limite.
- Vérification continue des données sauvegardés.
- Détection de rupture sonde selon les recommandations NAMUR NE 89.

## **Montage / installation**

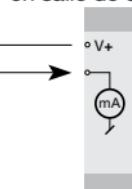

- Pour montage vertical ou horizontal sur rail DIN. En version 2-voies, 84 voies par mètre peuvent être montées.
- **N.B.:** Comme barrière S.I. pour le 6335D nous recommandons le PR5106B.

## Spécifications

### Plage de température :

-40°C à +60°C

### Spécifications communes :

Tension d'alimentation cc

Standard..... 8,0...35 Vcc

CSA, FM & ATEX..... 8,0...30 Vcc

Tension d'isolation, test / opération..... 1,5 kVca / 50 Vca

Tension d'isolation, voie 1 / voie 2 :

Standard..... 3,75 kVca

CSA, FM & ATEX..... 1500 Vca

Temps de chauffe..... 30 s

Kit de programmation ..... Loop Link et HART®

Rapport signal / bruit ..... Min. 60 dB

Temps de réponse (programmable) ..... 1...60 s

Vérification de l'EEprom ..... < 10 s

Dynamique du signal d'entrée ..... 22 bit

Dynamique du signal de sortie ..... 16 bit

Température d'étalonnage ..... 20...28°C

Précision, la plus grande des valeurs générales et de base :

Valeurs générales		
Type d'entrée	Précision absolue	Coefficient de température
Tous	≤ ±0,05% de l'EC	≤ ±0,005% de l'EC / °C

Valeurs de base		
Type d'entrée	Précision de base	Coefficient de température
Pt100 et Pt1000	$\leq \pm 0,1^\circ\text{C}$	$\leq \pm 0,005^\circ\text{C}/^\circ\text{C}$
Ni100	$\leq \pm 0,2^\circ\text{C}$	$\leq \pm 0,005^\circ\text{C}/^\circ\text{C}$
Résist. linéaire	$\leq \pm 0,1 \Omega$	$\leq \pm 5 \text{ m}\Omega / {}^\circ\text{C}$
Volt	$\leq \pm 10 \mu\text{V}$	$\leq \pm 0,5 \mu\text{V}/^\circ\text{C}$
Type TC: E, J, K, L, N, T, U	$\leq \pm 0,5^\circ\text{C}$	$\leq \pm 0,025^\circ\text{C}/^\circ\text{C}$
Type TC: B, R, S, W3, W5	$\leq \pm 1^\circ\text{C}$	$\leq \pm 0,1^\circ\text{C}/^\circ\text{C}$

Immunité CEM.....	< $\pm 0,1\%$ de l'EC
Immunité CEM améliorée : NAMUR NE 21, critère A, burst .....	< $\pm 1\%$ de l'EC

Effet d'une variation de la tension d'alimentation .....	< 0,005% de l'EC / Vcc
Taille max. des fils .....	1 x 1,5 mm <sup>2</sup> fil multibrins
Humidité .....	< 95% HR (sans cond.)
Dimensions .....	109 x 23,5 x 104 mm
Degré de protection .....	IP20
Poids (1 / 2 voies).....	145 / 185 g

#### Spécifications électriques, entrées :

Décalage max.....	50% de la valeur numérique max. sélectionnée
-------------------	---

#### Entrée RTD et entrée résistance linéaire :

Type	Valeur min.	Valeur max.	Plage min.	Standard
Pt100	-200°C	+850°C	10°C	IEC 60751
Ni100	-60°C	+250°C	10°C	DIN 43760
R lin.	0 Ω	7000 Ω	25 Ω	----

Résistance de ligne max. par fil.....	5 Ω
Courant de sonde .....	Nom. 0,2 mA
Effet de la résistance de ligne (3- / 4-fils) ...	< 0,002 Ω / Ω
Détection de rupture sonde .....	Oui
Détection de court-circuit .....	Si 0% > 30 Ω

**Entrées TC :**

## Sorties :

# SCHEMA DE PRINCIPE

# PROGRAMMATION

Le PRetrans 6335 peut être programmé des 3 manières suivantes:

1. Avec le kit de programmation Loop Link et le logiciel PReset de PR electronics A/S.
2. Avec le modem HART® et le logiciel PReset.
3. Avec le communicateur HART® chargé avec le DDL de PR electronics A/S.

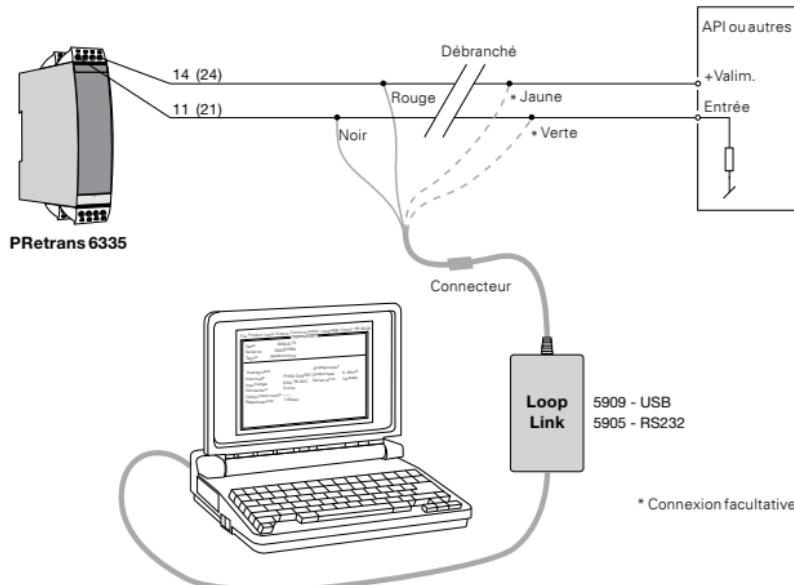

## 1: Loop Link

Pour le raccordement du Loop Link, veuillez vous reporter au schéma ci-dessous et à l'aide en ligne du logiciel PReset.

Lors de la communication avec des modules non-installés, les bornes 11, 12, 13, 14 (voie 1) et 21, 22, 23, 24 (voie 2) peuvent être démontés dans la zone non dangereuse pour connecter le kit de programmation.

Loop Link ne doit pas être utilisé pour communication avec des modules installés en zone dangereuse.

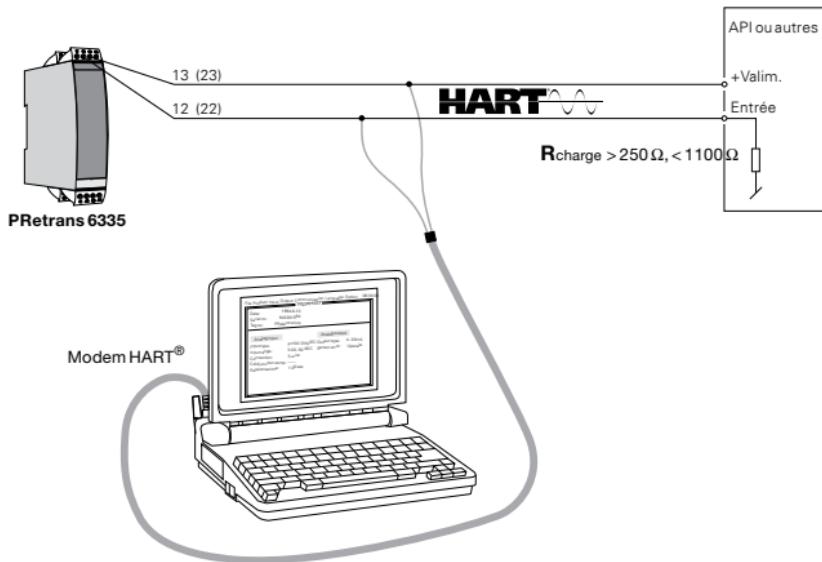

### Référence : Loop Link

## 2: Modem HART®

Pour le raccordement veuillez vous reporter au schéma ci-dessous et à l'aide en ligne du logiciel PReset.

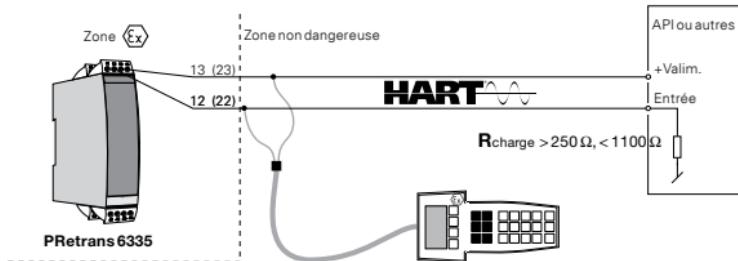

### Référence : Modem HART® 276D

## 3: Communicateur HART®

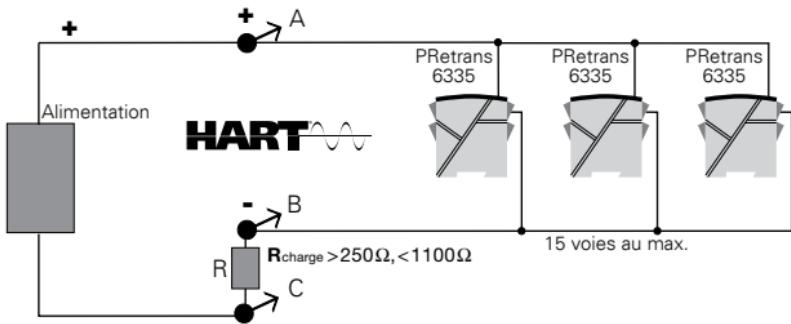

Pour le raccordement veuillez vous reporter au schéma ci-dessous. Pour avoir accès à tous les paramètres, le communicateur HART® doit être chargé avec le DDL spécifique du PR electronics A/S. Ce DDL peut être commandé chez PR electronics A/S ou chez la Fondation HART®.

### Référence : Communicateur HART® 275D

## RACCORDEMENT DES TRANSMETTEURS EN MULTI-ADDRESSAGE

- Le communicateur HART® ou le modem peuvent être connectés sur les points AB ou sur les points BC.

- Pour la communication digitale HART® de 2-fils, les sorties de 15 transmetteurs au maximum peuvent être connectées en parallèle.
- Chaque transmetteur sera doté d'un numéro unique entre 1 et 15. Si 2 transmetteurs ont le même numéro, tous les deux seront ignorés. Programmés pour multi-addressage les sorties des transmetteurs seront bloquées à 4 mA, et le courant max. dans la boucle sera donc de 60 mA.
- La communication se fait ensuite soit avec le communicateur HART® soit avec le modem HART®.
- Le logiciel PReset peut configurer le transmetteur individuel en multi-addressage et lui donner un addressage unique. Bestillingsskema: 6335

## **2-DRAHT MESSUMFORMER MIT HART®-PROTOKOLL - PRETRANS 6335**

- *Eingang für WTH, TE, Ω oder mV*
- *Extreme Messgenauigkeit*
- *HART®-Kommunikation*
- *Galvanische Trennung*
- *1- oder 2-kanalige Ausführung*

### **Verwendung**

- Linearisierte Temperaturmessung mit Pt100...Pt1000, Ni100...Ni1000 oder Thermoelementsensor.
- Temperaturdifferenzen oder eine Durchschnittstemperaturmessung von 2 Widerstands- oder TE-Sensoren.
- Umwandlung von linearer Widerstandsänderung in ein analoges Standard-Stromsignal, z.B. von Ventilen oder Niveau-Messwertgeber.
- Verstärkung von bipolaren mV-Signalen zu einem Standard 4...20 mA Stromsignal.
- Bis zu fünfzehn Umformer können in einem Multidrop-System parallel verbunden werden mit HART® Kommunikation.

### **Technische Merkmale**

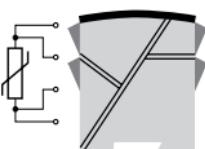

- PR6335 kann vom Benutzer innerhalb von wenigen Sekunden zur Messung in allen genormten Temperaturbereiche programmiert werden.
- Der WTH- und Widerstandseingang haben Leitungskompensation bei 2-, 3- oder 4-Leiter-Anschluss.
- PRetrans 6335 ist gemäß den strengsten Sicherheitsrichtlinien entwickelt und somit in Installationen mit SIL 2 Applikationen einsetzbar.
- Das Ausgangssignal kann für eine Begrenzung programmiert werden.
- Die gespeicherten Daten werden laufend kontrolliert.
- Fühlerfehlererkennung in Übereinstimmung mit der Richtlinien der NAMUR NE 89.

### **Montage / Installation**

- Wird vertikal oder horizontal auf DIN-Schiene montiert. Mit der Zweitkanal version können 84 Kanäle pro Meter installiert werden.
- **NB:** Als Ex-Sicherheitsbarriere für 6335D empfehlen wir 5106B.

# BLOCKDIAGRAMM

# PROGRAMMIERUNG

PRetrans 6335 kann in 3 verschiedener Weise programmiert werden:

1. Mittels PR electronics A/S' Kommunikationsschnittstelle Loop Link und der PReset PC Programmierungssoftware.
2. Mittels eines HART® Modems und der PReset PC Programmierungssoftware.
3. Mittels eines HART® Kommunikator mit dem DDL-Antrieb von PR electronics A/S ausgestattet.

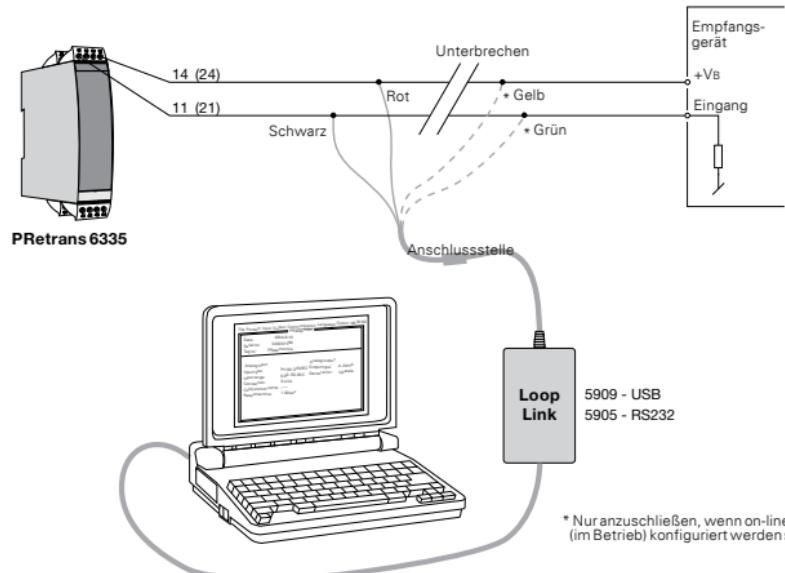

## 1: Loop Link

Bezüglich Programmierung verweisen wir auf die nachfolgende Zeichnung und die "Hilfe"-Funktion im PReset-Programm.

Bei der Kommunikation mit Modulen, die nicht installiert sind, ist es notwendig Stecker 11, 12, 13, 14 (Kanal 1) und 21, 22, 23, 24 (Kanal 2) abzumontieren, um die Verbindungsklemmen der Kommunikationsschnittstelle an die Steckerstifte zu verbinden.

Loop Link darf nicht zur Kommunikation mit Modulen, die in Ex-gefährdeten Bereichen installiert sind, benutzt werden.

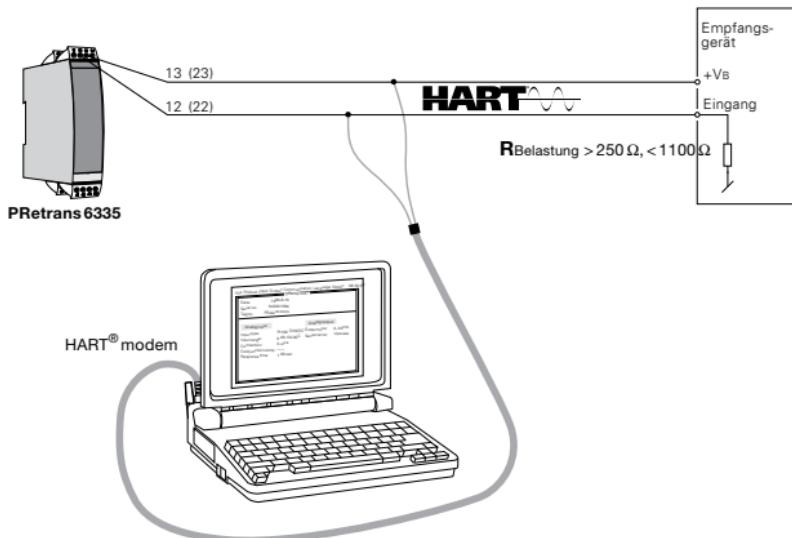

### Bestellangaben: Loop Link

## 2: HART® Modem

Bezüglich Programmierung verweisen wir auf die nachfolgende Zeichnung und die "Hilfe"-Funktion im PReset-Programm.

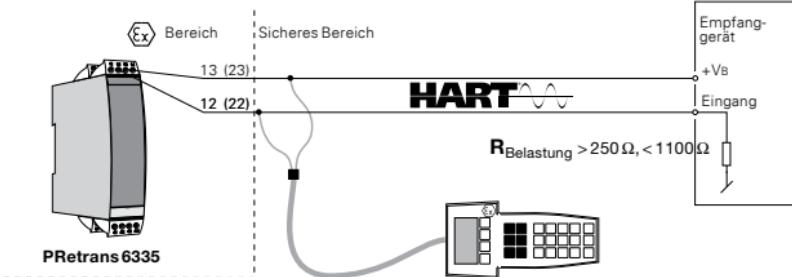

### Bestellangaben: HART® Modem 276D

## 3: HART® Kommunikator

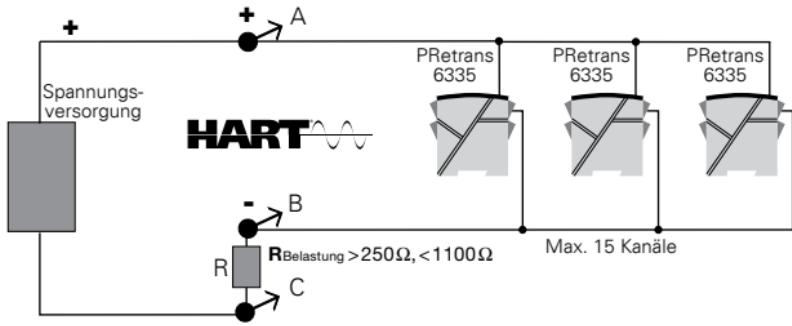

Bezüglich Programmierung verweisen wir auf die nachfolgende Zeichnung. Um Zutritt zu spezifischen Befehle, muss der HART® Kommunikator den DDL-Antrieb von PR electronics A/S ausgestattet sein. Der Antrieb ist von HART® Communication Foundation oder PR electronics A/S erhältlich.

### Bestellangaben: HART® Kommunikator 275D

## PARALLELANSCHLUSS VON SIGNALGEBERN (MULTIDROP)

- Ein HART®-Handterminal oder ein PC-Modem kann über die Punkte AB oder BC angeschlossen werden.

- Im Ausgang können bis zu 15 Signalgeber für eine digitale HART® Kommunikation über Zweileiter parallel geschaltet werden
- Jeder Signalgeber wird mit einer unverwechselbaren Nummer von 1 bis 15 konfiguriert. Wenn 2 Signalgeber mit der selben Nummer konfiguriert sind, werden sie beide ignoriert. Die Signalgeber müssen auf Multidropmodus (mit einem festen Ausgangssignal von 4 mA) programmiert werden. Der maximale Strom in der Schleife kann somit 60 mA betragen.
- Die Kommunikation kann über einen HART®-Kommunikator oder ein HART®-Modem erfolgen.
- Die PReset Software kann den einzelnen Signalgeber auf Multidropmodus einstellen und ihm eine unverwechselbare Adresse für wiederkehrende Abfrage (polling) zuteilen.

P<sub>o</sub> ≤ P<sub>i</sub>  
C<sub>a</sub> or C<sub>o</sub> ≥ C<sub>i</sub> + C<sub>cable</sub>  
L<sub>a</sub> or L<sub>o</sub> ≥ L<sub>i</sub> + L<sub>cable</sub>

### Installation notes.

The Transmitter must be installed in a suitable enclosure to meet installation codes stipulated in The National Electrical Code (ANSI-NFPA 70).

When installed in Class II locations the Transmitter shall be installed in an enclosure with a specified ingress protections of IP6X according to IEC60529 and Dust-tight conduit seals must be used.

Equipment that is FM-approved for intrinsic safety may be connected to barriers based on the ENTITY CONCEPT. This concept permits interconnection of approved transmitters, meters and other devices in combinations which have not been specifically examined by FM, provided that the agency's criteria are met. The combination is then intrinsically safe, if the entity concept is acceptable to the authority having jurisdiction over the installation.

The entity concept criteria are as follows:

The intrinsically safe devices, other than barriers, must not be a source of power.

The maximum voltage U<sub>i</sub>(V<sub>MAX</sub>) and current I<sub>i</sub>(I<sub>MAX</sub>), and maximum power P<sub>i</sub>(P<sub>MAX</sub>), which the device can receive and remain intrinsically safe, must be equal to or

greater than the voltage ( $U_o$  or  $V_{oc}$  or  $V_t$ ) and current ( $I_o$  or  $I_{sc}$  or  $I_t$ ) and the power  $P_o$  which can be delivered by the barrier.

The sum of the maximum unprotected capacitance ( $C_i$ ) for each intrinsically device and the interconnecting wiring must be less than the capacitance ( $C_a$ ) which can be safely connected to the barrier.

The sum of the maximum unprotected inductance ( $L_i$ ) for each intrinsically device and the interconnecting wiring must be less than the inductance ( $L_a$ ) which can be safely connected to the barrier.

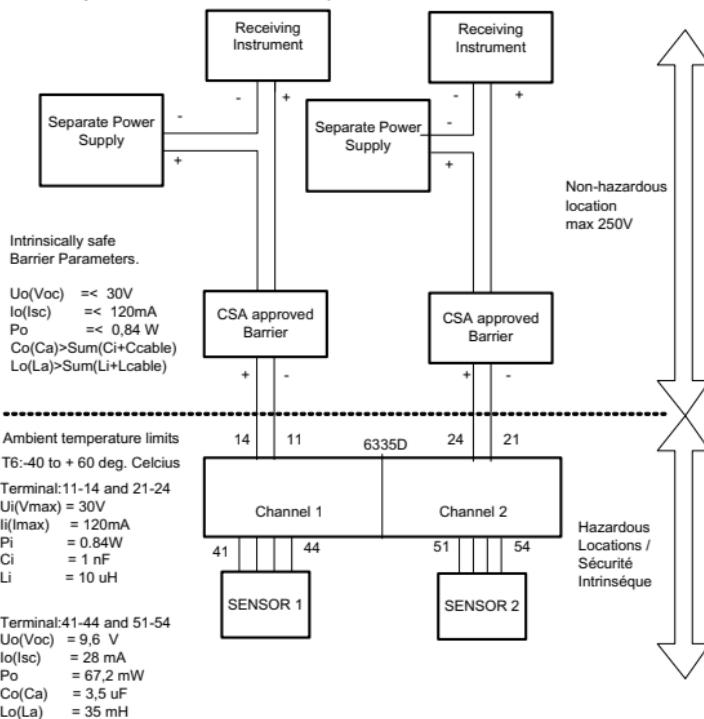

The entity parameters  $U_o, V_{oc}$  or  $V_t$ , and  $I_o, I_{sc}$  or  $I_t$ , and  $C_a$  and  $L_a$  for barriers are provided by the barrier manufacturer.

## CSA Installation Drawing 6335QC02.

6335D transmitters are approved as intrinsically safe in Zone 0 Group IIC or Class I, Division 1, Group A, B, C, D when installed according to Installation Drawing.

### 1. Connections with separate power supply and receiver.

Output: Standard 4 - 20mA loop

#### Warning:

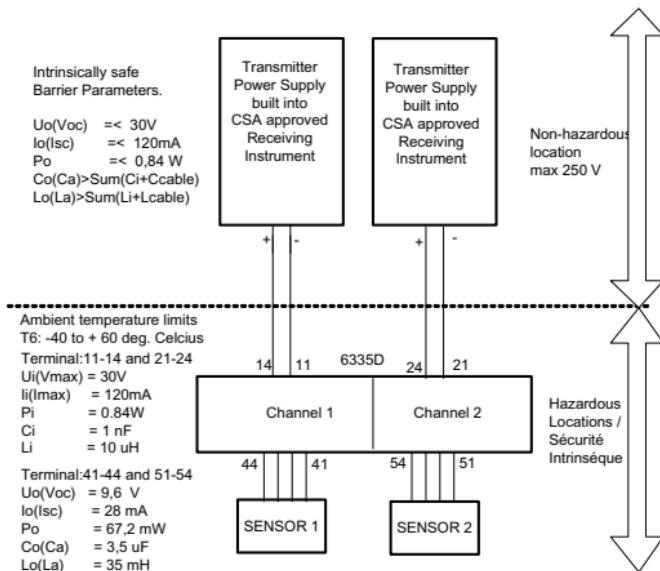

Substitution of components may impair intrinsic safety.

Channel 1 and Channel 2 are separate channels and therefore separate shielded cables shall be used for each channel.

The 6335 must be installed in a suitable enclosure to meet installation codes stipulated in the Canadian Electrical Code (CEC).

**2. Connection with power supply and barrier built into receiver.**

**Output:** Standard 4 - 20mA loop

**Warning:**

Substitution of components may impair intrinsic safety.

Channel 1 and Channel 2 are separate channels and therefore separate shielded cables shall be used for each channel.

The 6335 must be installed in a suitable enclosure to meet installation codes stipulated in the Canadian Electrical Code (CEC).

**Displays** Programmable displays with a wide selection of inputs and outputs for display of temperature, volume and weight, etc. Feature linearisation, scaling, and difference measurement functions for programming via PReset software.

**Ex interfaces** Interfaces for analogue and digital signals as well as HART® signals between sensors / I/P converters / frequency signals and control systems in Ex zone 0, 1 & 2 and for some modules in zone 20, 21 & 22.

**Isolation** Galvanic isolators for analogue and digital signals as well as HART® signals. A wide product range with both loop-powered and universal isolators featuring linearisation, inversion, and scaling of output signals.

**Temperature** A wide selection of transmitters for DIN form B mounting and DIN rail modules with analogue and digital bus communication ranging from application-specific to universal transmitters.

**Universal** PC or front programmable modules with universal options for input, output and supply. This range offers a number of advanced features such as process calibration, linearisation and auto-diagnosis.
