ADVARSEL

For at undgå fare for elektriske stød og brand skal sikkerhedsreglerne overholdes, og vejledningerne skal følges. Specifikationerne må ikke overskrides, og modulet må kun benyttes som beskrevet i det følgende. Installationsvejledningen skal studeres omhyggeligt, før modulet tages i brug. Kun kvalificeret personale (teknikere) må installere dette modul. Hvis modulet ikke benyttes som beskrevet i denne installationsvejledning, så forringes modulenes beskyttelsesforanstaltninger. Der må ikke tilsluttes farlig spænding til modulet, før dette er fastmonteret.

For at undgå eksplosion og alvorlig tilskadekomst: Moduler med mekaniske fejl skal returneres til PR electronics til reparation eller udskiftning. Reparation af modulet må kun foretages af PR electronics A/S.

I applikationer hvor farlig spænding er tilsluttet modulets ind-/udgang, skal det sikres, at der er tilstrækkelig afstand eller isolation mellem ledninger, klemmer og huller til omgivelserne (inkl. nabomoduler) til at opretholde beskyttelsen mod elektriske støder.

Stikket bag frontpladen på 3114 har forbindelse til indgangsklemmer, hvor der kan forekomme farlige spændinger.

Risiko for elektrostatisk ladning. For at forhindre risikoen for eksplosion pga. elektrostatisk opladning af kabinetten må modulene kun håndteres, når området er sikkert, eller når der er taget passende forholdsregler mod elektrostatiske udladninger.

SIKKERHEDSREGLER

Modtagelse og udpakning
Udpak modulet uden at beskadige det. Kontrollér ved modtagelsen, at modultypen svare til den bestilte. Indpakningen bør følge modulet, indtil dette er monteret på blivende plads.

Miljøforhold

Undgå direkte sollys, kraftigt støv eller varme, mekaniske rystelser og stød, og udset ikke modulet for regn eller kraftig fugt. Om nødvendigt skal opvarmning, ud over de opprige grænser for omgivelserstemperatur, forhindres ved hjælp af ventilation. Alle moduler kan anvendes i Overspændingskategori II og Forureningsgrad 2. Modulet er designet til at være sikkert mindst op til en højde af 2000 m.

Installation

Installation og tilslutning af modulet skal følge landets gældende regler for installation af elektrisk materiel bla. med hensyn til ledningstværtnit, forsikring og placering. Beskrivelse af indgang / udgang og forsyningsforbindelser findes i installationsvejledningen og på sideskiltet. Modulet er forsynet med skrueterminerale og skal forsynes fra en dobbeltisoleret / forstærket isoleret spændingsforsyning. En afbryder placeres let tilgængeligt og tæt ved modulet. Afbryderen skal mærkes således, at der ikke er tvivl om, at den afbryder spændingen til modulet. SYSTEM 3000 skal installeres på DIN-skinne iht. EN 60715.

UL-installation

Bug kun 60/75°C kobberledninger.
Ledningskvadrat..... AWG 26-12
Ul fil-nummer E314307
Modulet er af typen Open Type Listed Process Control Equipment. For at undgå at personer kommer til skade ved berøring af strømførende dele, skal modulet monteres i et kabinet.
Spændingsforsyningen skal være i overensstemmelse med NEC Class 2, som beskrevet i "National Electrical Code" (ANSI / NFPA 70).

cFMus installation i Division 2 eller Zone 2

FM17CA0003X..... Cl. I, Div. 2, Gr. A-D T4 el.
Cl. I, Zone 2, Ex nA IIC T4
FM17US0004X..... Cl. I, Div. 2, Gr. A-D T4 el.
Cl. I, Zone 2, AEx nA IIC T4

I class I, Division 2 eller Zone 2 installation skal modulet installeres i et kabinet, der kun kan åbnes ved brug af værkøj, og som passer til en eller flere af de fortrædningsmetoder for Class I, Division 2, der er specificeret i National Electrical Code (ANSI/NFPA 70) eller for Canada i Canadian Electrical Code (C22.1).

System 3000 moduler må kun tilsluttes til kredsløb med begrænset udgangseffekt iht. NEC Class 2, som beskrevet i National Electrical Code (ANSI / NFPA 70). Hvis modulene tilkobles redundant forsyningsspænding (to separate spændingsforsyninger), skal begge forsyninger opfyde dette krav. Når modulene installeres udendørs eller i områder med vand eller fugt, skal kabellenetet som minimum overholde kravene fra IP54.

Advarsel: Udforskning af komponenter kan forringes modulets egnethed til installation i zone 2 / division 2.

Advarsel: For at forhindre antændelse af eksplosive atmosfærer skal forsyningerne afbrydes, ved ledighedse/reparation påbøgedynes. Monter/demonter ikke stik, når forsyning er tilsluttet, og der forefindes en eksplosionsfarlig gasblanding.

Advarsel: Monter/demonter ikke modulet på power rail, når der forefindes en eksplosionsfarlig gasblanding.

IECEx, ATEX installation i Zone 2

IECEx KEM 10.0068 X..... Ex ec IIC T4 Gc eller
Ex ec nC IIC T4 Gc
KEMA 10ATEX0147 X..... II 3 G Ex ec IIC T4 Gc eller
II 3 G Ex ec nC IIC T4 Gc

For sikker installation skal følgende overholde: Moduler må kun installeres af kvalificerede personer, som er bekendt med national og international lovgivning, direktiver og standarder i det land, hvor modulet skal installeres.

Produktionsårs fremgår af de to første cifre i serienummeret.

Modulene skal installeres i et dertil egnet kabinet, som yder en IP-beskyttelse på mindst IP54 iht. EN/IEC60079-7, og som tager hensyn til de omgivelser, hvorfra modulene anvendes.

Hvis temperaturer under nominelle forhold overstiger 70°C ved kablers eller rørforbindelserne indgang, eller 80°C ved ledningernes forgrænsningspunkt, skal temperaturspecifikationerne for det valgte kabel overholde den faktisk målte temperatur.

For at forhindre antændelse af eksplosive atmosfærer skal forsyningerne afbrydes, før vedligeholdelse/reparation påbøgedynes. Monter/demonter ikke stik, når forsyning er tilsluttet, og der forefindes en eksplosionsfarlig gasblanding.

Advarsel: Monter/demonter ikke modulet på power rail, når der forefindes en eksplosionsfarlig gasblanding.

Rengøring
Modulet må, i spændingsløs tilstand, rengøres med en klud med fugtet med destilleret vand.

Elektriske specifikationer

Driftempetratur -25°C til +70°C
Driftempetratur, 3105 0 til +70°C
Lagtempetratur -40°C til +85°C
Forsyningsspænding, DC 16.8...31.2 VDC
Forsyningsspænding, 3333 2-trådsforsyning / 3...35 VDC
Forsyningsspænding, 3331 2-trådsforsyning / 5.5...35 VDC
Forsyningsspænding, 3337 2-trådsforsyning / 6.2...35 VDC
Forsyningsspænding, 3185 ≤ 1.25 V (0.015 x Voutput)
Forsyningsspænding, 3186 2-trådsforsyning / 6.0...35 VDC

Max. forbrug:

3101, 3102 0.52 W

3103 0.65 W

3111, 3112, 3113 0.7 W

3108 0.75 W

3105, 3117, 3331, 3333, 3337 0.8 W

3104, 3109, 3114, 3118 1.2 W

3185 30 mW per channel

3186A 50 mW per channel

3186B 50 mW per kanal

Isolationsspænding, test 2.5 kVAC

Isolationsspænding, arbejds 300 VAC (Zone 2, Div. 2)

Dobbelt isolation Indg. / udg. 1 / udg. 2 / forsyning

Relativ luftfugtighed < 95% RH (ikke kond.)

Mål (HxBxD) 113 x 6.1 x 115 mm

Kapslingsklasse IP20

Vægt 70 g

WARNING

To avoid the risk of electric shock and fire, the safety instructions of this guide must be observed and the guidelines followed. The specifications must not be exceeded, and the device must only be applied as described in the following. Prior to the commissioning of the device, this installation guide must be examined carefully. Only qualified personnel (technicians) should install this device. If the equipment is used in a manner not specified by the manufacturer, the protection provided by the equipment may be impaired. Until the device is fixed, do not connect hazardous voltages to the device.

To avoid explosion and serious injury: Modules having mechanical failures must be returned to PR electronics for repair or replacement. Repair of the device must be done by PR electronics A/S only.

In applications where hazardous voltage is connected to in-/outputs of the device, sufficient spacing or isolation from wires, terminals and enclosure - to surroundings (incl. neighbouring devices), must be ensured to maintain protection against electric shock.

The connector behind the front cover of 3114 is connected to the input terminals on which dangerous voltages can occur.

Potential electrostatic charging hazard. To avoid the risk of explosion due to electrostatic charging of the enclosure, do not handle the units unless the area is known to be safe, or appropriate safety measures are taken to avoid electrostatic discharge.

Safety Instructions

Receipt and unpacking

Unpack the device without damaging it. The packing should always follow the device until this has been permanently mounted. Check at the receipt of the device whether the type corresponds to the one ordered.

Environment

Avoid direct sunlight, dust, high temperatures, mechanical vibrations and shock, as well as rain and heavy moisture. If necessary, heating in excess of the stated limits for ambient temperatures should be avoided by way of ventilation. All devices can be used for Measurement / Overvoltage Category II and Pollution Degree 2. The module is designed to be safe at least under an altitude up to 2 000 m.

Mounting

Mounting and connection of the device should comply with national legislation for mounting of electric materials, i.e. wire cross section, protective fuse, and location. Descriptions of input / output and supply connections are shown in this installation guide and on the side label. The device is provided with field wiring terminals and shall be supplied from a Power Supply having double / reinforced insulation. A power switch should be easily accessible and close to the device. The power switch shall be marked as the disconnecting unit for the device. SYSTEM 3000 must be mounted on a DIN rail according to EN 60715.

UL Installation

Use 60/75°C copper conductors only.
Wire size AWG 26-12
Ul file number E314307
The device is an Open Type Listed Process Control Equipment. To prevent ignition resulting from accessibility to live parts the equipment must be installed in an enclosure. The power Supply unit must comply with NEC Class 2, as described by the National Electrical Code (ANSI / NFPA 70);

cFMus installation in Division 2 or Zone 2

FM17CA0003X..... Cl. I, Div. 2, Gr. A-D T4 or
Cl. I, Zone 2, Ex nA IIC T4
FM17US0004X..... Cl. I, Div. 2, Gr. A-D T4 or
Cl. I, Zone 2, AEx nA IIC T4

In class I, Division 2 or Zone 2 installations, the subject equipment shall be mounted within a tool-secured enclosure which is capable of accepting one or more of Class I, Division 2 wiring methods specified in the National Electrical Code (ANSI/NFPA 70) or in Canada in the Canadian Electrical Code (C22.1). The 3000 System Isolators and Converters must be connected to limited output NEC Class 2 circuits, as outlined in the National Electrical Code (ANSI / NFPA 70), only. If the devices are connected to a redundant power supply (two separate power supplies), both must meet this requirement.

Where installed in outdoor or potentially wet locations the enclosure shall at a minimum meet the requirements of IP54.

Warning: Substitution of components may impair suitability for zone 2 / division 2.

Warning: To prevent ignition of the explosive atmospheres, disconnect power before servicing and do not separate connectors when energised and an explosive gas mixture is present.

Warning: Do not mount or remove devices from the power rail when an explosive gas mixture is present.

IECEx, ATEX installation in Zone 2

IECEx KEM 10.0068 X..... Ex ec IIC T4 Gc or
Ex ec nC IIC T4 Gc
KEMA 10ATEX0147 X..... II 3 G Ex ec IIC T4 Gc or
II 3 G Ex ec nC IIC T4 Gc

For safe installation the following must be observed. The device shall only be installed by qualified personnel who are familiar with the national and international laws, directives and standards that apply to this area. Year of manufacture can be taken from the first two digits in the serial number.

The devices shall be installed in a suitable enclosure providing a degree of protection of at least IP54 according to EN/IEC60079-7, taking into account the environmental conditions under which the equipment will be used.

When the temperature under rated conditions exceeds 70°C at the cable or conduit entry point, or 80°C at the branching point of the conductors, the temperature specification of the selected cable shall be in compliance with the actual measured temperature.

To prevent ignition of the explosive atmospheres, disconnect power before servicing and do not separate connectors when energised and an explosive gas mixture is present.

Warning: Do not mount or remove devices from the power rail when an explosive gas mixture is present.

EU DECLARATION OF CONFORMITY

(3xxxDoC_103)

As manufacturer

PR electronics A/S, Lerbakken 10, DK-8410 Rønde

hereby declares that the following product:

Type: 31xx, 32xx, 33xx and 34xx

Name: 6 mm temperature transmitters and signal devices

From serial no.: 160805769

is in conformity with the following directives and standards:

The EMC Directive 2014/30/EU and later amendments

EN 61326-1 : 2013

Immunity test requirements for equipment intended to be used in an industrial electromagnetic environment. For specification of the acceptable EMC performance level, refer to the electrical specifications for the device.

The Low Voltage Directive 2014/35/EU and later amendments

EN 61010-1 : 2010

*The ATEX Directive 2014/34/EU and later amendments

EN 60079-0 : 2018, EN 60079-7 : 2015 + A1 : 2018 and EN 60079-15 : 2019

ATEX certificate: KEMA 10ATEX0147 X

The RoHS2 Directive 2011/65/EU and later amendments

EN 50951 : 2012

Rønde, 23 February 2021
