

## Inductive proximity sensor

### 8342

- NAMUR DIN 19234
- Switching distance: 2 mm
- Max. frequency: 800 Hz

#### Application

- Detector for registration of rotation, positioning etc. in connection with frequency converters, pulse calculators, etc.

#### Technical characteristics

- Supply voltage: 8.2 VDC / 1 k $\Omega$
- Switching distance: 2 mm
- Cable length: 2 m
- Material: Stainless steel
- Protection degree: IP67
- Ambient temperature: -30...+70°C
- Max. frequency: 800 Hz
- Dimensions ( $\varnothing$  x L): M12 x 30 mm
- Weight: 70 g
- Color code: Brown: +V, Black: +input
